Two Spheres Physical And Strategic Design In Architecture:

Two Spheres Leonard R. Bachman, 2012 Proposes an aesthetic connection between two equal aspects of architectural design the ideal and the reality Addressing architectural thinkers from the broad realms of academia and practice it is suitable either as a seminar text a guide to contemporary design issues or as a theoretical work **Case Study Strategies for Architects and Designers** Marja Sarvimaki, 2017-06-27 Case Study Strategies for Architects and Designers explains methods in evidence based design also called practice based research to show you the value of research to your designs Topics covered pertain to data collection and analysis techniques including surveys interviews fieldwork participatory design occupancy evaluations and memory sketching Integrative data evaluation theoretical sampling triangulation pattern matching logic and analytical generalization are also discussed Global research precedents exercises further reading section summaries sidebars more than 30 black and white images and tables will help you conduct empirical inquiries in real life contexts *Ardeth #06 (I - Spring 2020)* AA.VV., 2020-10-16 Incorporating contingency into our fundamental thinking about architecture contradicts the way we theorize practice and historicize the field Accidents happen yet architects rarely let chance play a role in their visions How contingency play a role in architectural design and thinking How designers incorporate change in their practice The forward facing nature of contingency scholarship if we give it a name may embed possible worlds that are more just more compassionate and more aware of the inequalities that accompany the uneven distribution of the most vital resource i our times space This issue began with the aim of exploring contingency thinking and is completed from within contingent times when nothing seems certain and contingency is less a lens than the air we breathe

Constructing the Architect Leonard R. Bachman, 2019-01-22 Unlike books that concentrate on the monuments and other artefacts that architects produce *Constructing the Architect* focuses on architecture as a disciplinary and professional process an institution of society and a career of learning and mastery In doing so it offers a lens into the architecture of architecture Mapping architecture as a coherent whole Leonard Bachman shows that the field must be understood as four mutually reinforcing modes of inquiry design research strategy and education Within this framework he explains how institutions and actors hold differing perspectives on the critical discourse that advances architecture and identifies the various tensions and leverage points for change within the discipline Featuring over 100 illustrations to support understanding of this highly visual subject this is an essential introduction for any student seeking to understand what it means to be an architect and to enter the professional discourse *Computer-Aided Architectural Design. INTERCONNECTIONS: Co-computing Beyond Boundaries* Michela Turrin, Charalampos Andriotis, Azarakhsh Rafiee, 2023-07-04 This book includes the refereed Selected Papers of the 20th International Conference on Computer Aided Architectural Design INTERCONNECTIONS Co computing Beyond Boundaries CAAD Futures 2023 held in Delft The Netherlands in July 5 7 2023 The 43 full papers included in this book were carefully reviewed and selected from 144

submissions They were organized in topical sections as follows algorithmic architectural design AI powered architectural ideation performance based design urban models and analysis urban design digital design materials and fabrication spatial information data and semantics building data analysis visualisation interaction and building massing and layouts

Revealing Architectural Design Philip D. Plowright, 2014-01-10 *Revealing Architectural Design* examines the architectural design process from the point of view of knowledge domains domain syntax coherence framing thinking styles decision making and testing Using straightforward language the book connects general design thinking to underlying frameworks that are used in the architectural design process The book provides historical grounding as well as clear examples of real design outcomes It includes diagrams and explanations to make that content accessible The frameworks and their methods are described by what they can accomplish what biases they introduce and the use of their final outcomes *Revealing Architectural Design* is an advanced primer useful to anyone interested in increasing the quality of their architectural design proposals through understanding the conceptual tools used to achieve that process While it is intended for undergraduate and graduate students of architectural design it will also be useful for experienced architectural practitioners For the non architect this book opens a window into the priorities of a discipline seldom presented with such transparency

exlibris Giovanni Corbellini, 2022-05-18 *Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices far an ultimate legitimation In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences*

The Nordic Model and Physical Culture Mikkel Tin, Frode Telseth, Jan Ove Tangen, Richard Giulianotti, 2019-11-26 This book examines the relationships between the Nordic social democratic welfare system The Nordic Model and physical culture across the domains of sport education and public space Presenting important new empirical research it helps us to understand how the paradoxical blend of social democracy and liberalism in the Nordic countries influences physical culture which in turn contributes to a quality of life that ranks highest in the world Drawing on perspectives from sociology cultural studies history education political science outdoor studies and urban studies the book explores topics such as dance education for sport students doping in cross country skiing outdoor education the active body and the ideology of public parks It includes research material from across the region including Norway Sweden Iceland Finland and Denmark This is fascinating reading for anyone with an interest in physical culture sport studies leisure studies or outdoor studies as well as sociologists or political scientists with an interest in Nordic politics culture and society

Socio-Technical Networks Fei Hu, Ali Mostashari, Jiang Xie, 2010-11-17 While there are sporadic journal articles on socio technical networks there s long been a need for an integrated resource that addresses concrete socio technical network STN design issues from algorithmic and engineering perspectives Filling this need *Socio Technical Networks Science and*

Engineering Design provides a complete introduction to **Unplugging the City** Fábio Duarte, Rodrigo Jose Firmino, 2017-10-16 Modernity has entrusted technology with such power that it is treated as an autonomous entity with its own manners and morals Technological disruptions are also socially disruptive technological failures reveal both the constituents of the technology itself and the social fabric woven by this technology Cities are the quintessential technological arrangement not only materially but also as a conceptual framework the ubiquity of technology makes us think and plan cities mostly in terms of technological arrangements Unplugging the City The Urban Phenomenon and its Sociotechnical Controversies proposes a conceptual and methodological framework for analyzing certain urban phenomena as a technological assemblage It demonstrates through multiple case studies the sociotechnical complexities involved in the stabilization and disruption of urban technological arrangements Examples range from the urban phantasmagorias portrayed in science fiction movies to the urban proposals of Brasilia and Masdar from the book of bike sharing systems to pervasive global surveillance systems Written by Fábio Duarte and Rodrigo Firmino based on their original research and publications this is an essential resource for those interested in the theory and study of technology and its inextricable influence on the city

Strategies for Landscape Representation Paul Cureton, 2016-12-08 Strategies for Landscape Representation discusses a variety of digital and analogue production techniques for the representation of landscape at multiple scales Careful consideration is required to represent time and to ensure accuracy of representation and evaluation in the landscape Written as a guide for making appropriate selection of a wide variety of visualisation tools for students and built environment professionals with an interest in landscape the book charts emerging technologies and historical contexts whilst also being relevant to landscape legislation such as Building Information Modelling BIM and Landscape Assessment This book is an innovation driven text that encourages readers to make connections between software technology and analogue modes The management choice and combination of such modes can arguably narrow the unknown of landscape character address the issues of representing time and change in landscape and engage and represent communities perceptions and experience of landscape Showcasing international examples from landscape architecture planning urban design and architecture artists visualisers geographers scientists and model makers the vitality of making and intrinsic value of representational work in these processes and sites is evidenced An accompanying companion website provides access to original source files and tutorials totalling over a hundred hours in mapping and GIS diagrams and notation photomontage 3D modelling and 3D printing

Service-Learning in Design and Planning Tom Angotti, Cheryl Doble, Paula Horrigan, 2012-01-03 An authoritative guide to service learning and collaborative design that challenges the boundaries between communities and universities and advances meaningful partnerships

University Planning and Architecture Jonathan Coulson, Paul Roberts, Isabelle Taylor, 2010-09-23 The environment of a university what we term a campus has long been the setting for some of history's most exciting experiments in the design of the built environment Christopher Wren at Cambridge Thomas Jefferson at

Virginia Le Corbusier at Harvard Louis Kahn at Yale and Norman Foster in Berlin the calibre of practitioners that have worked for universities is astounding This book comprehensively documents the worldwide evolution of university design from the Middle Ages to the present day uncovering the key developments which have shaken the world of campus planning A series of detailed and highly illustrated case studies profile universally acclaimed campuses that through their planning architecture and landscaping have succeeded in making positive contributions to the field Drawing on these examples the book turns to the strategies behind campus planning in today s climate Exploring the importance of themes such as landscape architecture place making and sustainability within university development the book consolidates the lessons learnt from the rich tradition of campus development to provide a good practice guide for anyone concerned with planning environments for higher education

Contemporary Issues in Branding Pantea Foroudi, Maria Palazzo, 2019-12-06 This book provides students and academics with a comprehensive analysis of the theory and practice of branding The challenge to explore new and effective ways of harnessing the power of communication to engage with company stakeholders in interactive immediate and innovative ways is ever present in the digital era Digital marketing and social media create opportunities for managers to communicate their brand s identity to their consumers and stakeholders Yet limited empirical research exists to elucidate these issues and less still that assists our understanding of branding issues at an international level Recognising the complexity and plurality at the heart of the branding discipline this text explores the relationship between brands identity and stakeholders Working through building designing and maintaining a brand the authors consider such aspects as strategic planning and campaign management research and measurement media relations employee communication leadership and change communication and crisis branding Critically differing methods and approaches applied to branding and communication research design are assessed including both qualitative and quantitative methods Proposing a mixture of theory and practice with international case studies this book is an invaluable companion for advanced undergraduate and postgraduate students academics of marketing and strategic brand management as well as managers and decision makers globally

Reconstruction of the Public Sphere in the Socially Mediated Age Kaoru Endo, Satoshi Kurihara, Takashi Kamihigashi, Fujio Toriumi, 2017-10-31 The aim of this book is to establish a basis for resolving the various issues facing modern society by exploring the field of Computational Social Science which fuses the social and natural sciences Today society is threatened by problems concerning the environment population growth hunger and epidemics all of which could lead to the extinction of humankind However attempting to resolve these issues is extremely difficult because of the complex intertwined factors involved and because these issues are not just matters related to nature and the environment but also to society In this book we investigate this aporia of the social sciences with the help of big data which has gained considerable attention in recent years and techniques such as agent based simulation Our aim is to resolve the complex system problems characteristic of the present age In this regard the book focuses on specific issues such as the

reconstruction of public character in our social media saturated modern lifestyle the current state of social capital and the resultant social changes **Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change**

Gustavo J. Nagy, Desalegn Yayeh Ayal, 2025-11-04 Over recent years nature based solutions NbS have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process More specifically the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation NbS are methods that use and enhance nature to improve social and environmental challenges They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people Therefore these solutions are useful in climate change adaptation and mitigation There are 3 main areas which NbS may target namely reducing exposure reducing sensitivity and supporting adaptive capacity Reducing exposure refers to protecting areas from existing climate change effects There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts It is against this background that the Handbook of Nature Based Solutions to Mitigation and Adaptation to Climate Change is being produced The publication will showcase experiences related to NbS from around the world In particular it will gather examples of projects studies and the latest thinking on NbS which can serve the purpose of inspiring and fostering further works in this key area Thanks to its scope and thematic diversity the book will be of special interest to representatives from government organisations researchers and students from a wide range of natural and social sciences courses It will also provide useful information to practitioners and representatives from non governmental organisations *Space Architecture* Daniel Inocente, 2025-11-19 An exciting and authoritative discussion of the latest advances in the technology required for space travel and space exploration In *Space Architecture Principles Challenges and Innovations* experienced architect and designer Daniel Inocente delivers a comprehensive exploration of the design and development of habitats and infrastructure required to support human life in space The book offers readers a thorough description of the principles challenges and solutions currently animating discussions in this emerging field Beginning with an introduction that establishes the central importance of space architecture Inocente explains the interdisciplinary nature of the field and demonstrates how integrated knowledge from engineering architecture environmental science and psychology are coming together to build a spacefaring future for humanity Readers will also find A thorough introduction to space habitat design including discussions of pre integrated prefabricated and in situ derived habitats Comprehensive explorations of the environmental challenges posed by space and space travel including microgravity extreme temperatures vacuum and ionizing radiation Practical discussions of space destinations like low earth orbit deep space moons and planets Complete treatments of mobility architecture including surface mobility systems and lunar terrain vehicles Perfect for both architecture and aerospace professionals *Space Architecture Principles Challenges and Innovations* will also benefit researchers with an interest in space architecture students of architecture aerospace engineering or space

studies and laypeople enthusiastic about space travel and space exploration *Designing Sustainable Cities in the Developing World* Georgia Butina Watson, 2016-04-22 Can conservation of the built heritage be reconciled with the speed of urban change in cities of the developing world What are the tools of sustainable design and how can communities participate in the design of the environments in which they live and work These are some of the questions explored within this innovative and richly illustrated book A wealth of examples drawn from Mexico Brazil Indonesia Egypt Saudi Arabia India and Myanmar demonstrate how rapid physical and social change has swept away historic urban quarters and the cultural heritage they represent Written in an accessible style the rich mix of concepts research methods analysis and practice based tools is designed for academics and professionals alike Leading academics Zetter and Watson have produced a fascinating book that is amongst the first to explore the concept of urban sustainability within the context of urban design in the developing world

Design for a Vulnerable Planet Frederick Steiner, 2011-05-16 We inhabit a vulnerable planet The devastation caused by natural disasters such as the southern Asian tsunami Hurricanes Katrina and Ike and the earthquakes in China's Sichuan province Haiti and Chile as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population have made it clear that business as usual is no longer sustainable We need to find ways to improve how we live on this planet while minimizing our impact on it *Design for a Vulnerable Planet* sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience Drawing on his own and others experiences across three continents Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection He begins by establishing the foundation for a more ecological approach to planning and design adopting a broad view of ecology as encompassing human and natural urban and wild environments Steiner explores precedents for human ecological design provided by architect Paul Cret landscape architect Ian McHarg and developer George Mitchell while discussing their planning for the University of Texas campus the Lake Austin watershed and The Woodlands Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State including regionalism urbanism and landscape in China and Italy He also examines the lessons to be learned from human and natural disasters such as 9/11 Hurricane Katrina and the BP oil spill Finally Steiner offers a blueprint for designing with nature to help heal the planet's vulnerabilities What People Want Michael Shamiyeh, 2005 Architects today are increasingly subject to the dictates of the free market globalism and the gradual privatization of state institutions Indeed pressure to alter their projects to conform to market forces and popular taste has never been greater Must successful design correspond to the wishes of the masses On what exactly are the trends and expectations of the general public based Is design always a response against popular trends or can adapting to popular tendencies also generate the potential to create a better living environment *What People Want* is an examination of the concept of populism by internationally known contributors such as
