UBUNTU Contributionism Michael Tellinger, 2013 *UBUNTU Contributionism A Blueprint For Human Prosperity* The path that brought us here as a species is not only filled with lies and deception of unimaginable proportion but also with continuous manipulation of the human race that goes back thousands of years all controlled by money Michael Tellinger has come full circle since his epic *Slave Species of God* in 2006 by proposing a blueprint for the emancipation of the slave species called humanity Tellinger exposes the previously misunderstood origins of money and the rise of the royal banking elite that have controlled the world for millennia and continue to do so today through the modern banking families He points out that money did not evolve from thousands of years of barter and trade but that it was maliciously introduced to the human race as a tool of absolute control and enslavement Tellinger makes a strong case that if we do not understand our human origins we cannot come to terms with why the world is so messed up in the 21st century He demonstrates that our current situation presents us with a unique opportunity to change the course of our destiny Michael Tellinger describes how the ancient African philosophy of UBUNTU will allow us to seamlessly move from a divided money driven society to united communities driven by people their passion for life and their God given talents Coming to terms with our enslavement as a species is critical to discovering the path to full enlightenment UBUNTU Contributionism presents a solid foundation for a new social structure to take us into a new era of true freedom from financial tyranny and real prosperity on every level of human endeavour Find out about the UBUNTU Movement's plan of action called ONE SMALL TOWN Will Change The World Get involved and become a seed of consciousness and real change in your community www.ubuntuplanet.org *Earthrise: Conscious Creation of UBUNTU/Contributionism Communities* Michael Moriarty, 2017-09-18 This book picks up where my last book *The Awakening of Humanity What You Need to Know* left off with a possible future timeline that leads to a New Earth The political and economic foundation of that New Earth civilization lies in UBUNTU Contributionism Communities In this book I explain what it will take to create attract such Communities and why it is of some urgency that those who wish to live in them begin to create attract them now *Ubuntu Philosophy for the New Normalcy* Jahid Siraz Chowdhury, Haris Abd Wahab, Mohd Rashid Mohd Saad, Golam M. Mamadou Diawara, Elísio S. Macamo, Jean-Bernard Ouédraogo, 2019-01-17 How realistic is it to expect translation to render the world intelligible in a context shaped by different historical trajectories and experiences Can we rely on human universals to translate through the unique and specific webs of meaning that languages represent If knowledge production is a kind of translation then it is fair to assume that the possibility of translation has largely rested on the idea that Western experience is the repository of these human universals against the background of which different human experiences can be rendered intelligible The problem with this assumption however is that there are limits to Western claims to universalism mainly because these claims were at the service of the desire to justify imperial expansion This book addresses issues arising from these claims to universalism in the process of producing knowledge about diverse African social realities It shows that the idea of knowledge production as translation can be usefully deployed to inquire into how knowledge of Africa translates into an imperial attempt at changing local norms institutions and spiritual values Translation in this sense is the normalization of meanings issuing from a local historical experience claiming to be universal The task of producing knowledge of African social realities cannot be adequately addressed without a prior critical engagement with how translation has come to shape our ways of rendering Africa intelligible

Integral Renewal Dr Alexander Schieffer,Professor Ronnie Lessem,2015-06-28 In 2010 Ronnie Lessem and Alexander Schieffer published their seminal work on Integral Research and Innovation whereby they identified the four R s relational and renewal reason and realization based research paths that altogether encompass the major qualitative research methods and methodologies Within each path they identified a trajectory from origination to transformation via foundation and emancipation However these paths underlying the research process conventionally termed method were disconnected from the integral economic and enterprise content conventionally termed literature with which they were concerned In this book Integral Renewal they seek to remedy such in two major respects As transformative masters and PhD programs are focused on the Global South where the vast majority of the world s population is based as well as those developmental agencies focused on such the great majority of the people with whom the authors deal select the relational research path and the path of renewal over and above

the paths of reason and realization The focus of this book will be on these two paths of integral research now interconnected with integral enterprise and economics Uniquely the authors pursue research and innovation in a systematic way In that respect while their prior Integral Research book still provides the research foundation for the four southern and eastern northern and western paths this book will focus on the former two relational southern and renewal eastern from the combined perspectives of research process and economic and enterprise content
