Navy Board Ship Models Nick Ball, Simon Stephens, 2018-07-30 A beautifully illustrated history of the early ship models of the Royal Navy that are prized today as works of art From about the middle of the seventeenth century the Royal Navy's administrators began to commission models of their ships that were accurately detailed and for the first time systematically to scale These developed a recognized style which included features like the unplanked lower hull with a simplified pattern of framing that emphasized the shape of the underwater body Exquisitely crafted these were always rare and highly prized objects indeed Samuel Pepys expressed a profound desire to own one and today they are widely regarded as the acme of the ship modeler's art Today examples are the highlights of collections across the world valued both as art objects and as potential historical evidence on matters of ship design However it was only recently that researchers began to investigate the circumstances of their construction their function and the identities of those who made them This book by two curators who have worked on the world's largest collection of these models at the National Maritime Museum in Greenwich England summarizes the current state of knowledge outlines important discoveries and applies this newfound understanding to many of the finest models in the collection As befits its subject *Navy Board Ship Models* is visually striking with numerous color photographs that make it as attractive as it is informative to anyone with an interest in modelmaking or historic ships
