**Psychological Theories for Environmental Issues** Mirilia Bonnes, 2017-03-02. Environmental psychology is an increasingly important area of research focusing on the individual and social factors responsible for many critical human responses to the physical environment. With such rapid and widespread growth, the main theoretical strands have often been left unclear and their scientific and practical implications have been underdeveloped. This essential and stimulating book contextualizes and critically analyzes the main theoretical ideas. It compares the different theories, assessing each one's possibilities and limitations and demonstrates how each approach has been used for the development of knowledge of environmental psychology. The research area infiltrates a broad selection of disciplines including psychology, architecture, planning, geography, sociology, environmental issues, economics and law. It also offers significant contributions to a wide range of policy evaluations. It will prove invaluable to academics and practitioners from across these disciplines, above all those in planning, environmental studies, human geography and psychology. **Theoretical Issues in Policy Analysis** M. E. Hawkesworth, 1988-08-09. What is the relation between policy analysis and political decision making? Is the policy analyst a handmaiden of democracy or an agent of technocracy? Do recent debates in the policy literature illuminate or obfuscate these issues? What analytic techniques are available to resolve such questions? This study considers the nature of policy inquiry in detail and explores norms and theoretical assumptions seldom subjected to scrutiny. The author demonstrates how conceptual presuppositions and methodological commitments have constricted our understanding of political problems and so hindered prescriptions for viable policy options. Proposed here is an alternative framework for policy inquiry that is both pragmatic and sophisticated. Hawkesworth considers the implications of this alternative model in a series of case studies that

addresses important foreign and domestic policy issues The epistemic and practical criticisms presented in this study provide new direction for the field of policy studies
