Theorizing Revolutions Warwick St In European Philosophy:

Theorizing Modernity Peter Wagner,2001-03-20 This book argues that sociology has lost its ability to provide critical diagnoses of the present human condition because sociology has stopped considering the philosophical requirements of social enquiry The book attempts to restore that ability by retrieving some of the key questions that sociologists tend to gloss over inescapability and attainability The book identifies five key questions in which issues of inescapability and attainability emerge These are the questions of the certainty of our knowledge the viability of our politics the continuity of our selves the accessibility of the past and the transparency of the future The book demonstrates how these questions are addressed in different forms and by different intellectual

Democracy, Religious Pluralism and the Liberal Dilemma of Accommodation Monica Mookherjee,2010-11-29 How should liberal democratic governments respond to citizens as religious believers whose values norms and practices might lie outside the cultural mainstream Some of the most challenging political questions arising today focus on the adequacy of a policy of live and let live liberal toleration in contexts where disputes about the metaphysical truth of conflicting world views abound Does liberal toleration fail to give all citizens their due Do citizens of faith deserve a more robust form of accommodation from the state in the form of recognition This issue is far from settled Controversies over the terms of religious accommodation continue to dominate political agendas around the world This is the first edited collection to provide a sustained examination of the politics of toleration and recognition in an age of religious pluralism The aftermath of the events of September 11th have dramatised the urgency of this debate It has also surfaced nationally and globally indisputable questions about terrorism security and gender and human rights questions in relation to minority communities This volume brings together a group of new and established scholars from the fields of law and philosophy who all present fresh and challenging perspectives on an urgent debate It will be indispensable reading for advanced researchers in political and legal philosophy religious and cultural studies and related disciplines

of global democracy Presents a state of the art analysis of the foundations of global democracy **Case Studies and**

Adebani, E. Obadare,2010-07-05

This volume advances extant reflections on the state constituted as the Ur Power in society particularly in Africa It analyzes how various agents within the Nigerian society encounter the state ranging from the most routine form of contact to the spectacular While many recent collections have reheated the old paradigms of the perils of federalism corruption ethnicity etc our focus here is on encounter that is the nuance and complexity of how the state shapes society and vice versa Through this we depart from the standard state versus society approach that proves so limiting in explaining the African political landscape **Ether and Modernity** Jaume Navarro,2018-08-30 Ether and Modernity offers a snapshot of the status of an

epistemic object the ether or aether in the early twentieth century The contributed papers show that the ether was often regarded as one of the objects of modernity hand in hand with the electron radioactivity or X rays and not simply as the stubborn residue of an old fashioned long discarded science The prestige and authority of scientists and popularisers like Oliver Lodge and Arthur Eddington in Britain Phillip Lenard in Germany or Dayton C Miller in the USA was instrumental in the preservation defence or even re emergence of the ether in the 1920s Moreover the consolidation of wireless communications and radio broadcasting indeed a very modern technology brought the ether into audiences that would otherwise never have heard about such an esoteric entity The ether also played a pivotal role among some artists in the early twentieth century the values of modernism found in the complexities and contradictions of modern physics such as wireless action or wave particle puzzles a fertile ground for the development of new artistic languages in literature as much as in the pictorial and performing arts Essays on the intellectual foundations of Umberto Boccioni's art the linguistic techniques of Lodge and Ernst Mach's considerations on aesthetics and physics witness to the imbricate relationship between the ether and modernism Last but not least the ether played a fundamental part in the resurgence of modern spiritualism in the aftermath of the Great War This book examines the complex array of meanings strategies and milieus that enabled the ether to remain an active part in scientific and cultural debates well into the 1930s but not beyond This portrait may be easily

regarded as the swan song of an epistemic object that was soon to fade away as shown by Paul Dirac's unsuccessful attempt to resuscitate some kind of aether in 1951 with which this book finishes *British Books*, 1906
