Theory And Practice Of Local Governance And Economic Development:

The Theory and Practice of Local Governance and Economic Development M. Considine, S. Giguere, 2008-02-14

This book provides a comparative study of the use of partnerships and new forms of governance to achieve policy goals that promote economic and social development. In addition to a consideration of the theoretical challenges posed by these institutional developments, the book reviews recent experiences in Asia Pacific, Europe, and North America. *Local Government Economics in Theory and Practice* David Neden King, 2022-01-29. First published in 1992, *Local Government Economics in Theory and Practice* is an effort to rectify the lack of a comparative analysis between democratic local governments of various countries and their methods of financing. A series of chapters examines the theoretical basis for different systems of local government finance and how these systems work out in practice. The book covers various aspects of reforms in the United Kingdom and elsewhere and includes a discussion of the rationale for the community charge. This collection of essays will be of importance to students of economics and public policy. **Decentralization and Governance**

Capacity Evrim Tan, 2018-11-27. It is widely assumed that the relationship between governance capacity and decentralization determines the success in governance, but how does this relationship function? It is largely contested. Does decentralization lead to an improvement in governance capacities, or are certain capacities preconditioned in order for decentralization to lead to better governance? Relying on an empirical study of Turkish provincial municipalities, the book argues that success in decentralization is strongly influenced by the socioeconomic conditions in the province and, to a lesser extent, by the local government's capacity. The book provides a novel approach to capacity building practices and decentralization reforms by suggesting that the relationship between decentralization and governance capacity should be addressed not only on the organizational but also on the developmental level. In this way, the book proposes asymmetrical decentralization according to socioeconomic development at the subnational level for better governance outcomes. Devolution and Localism in England

David M. Smith, Enid Wistrich, 2016-04-22. Combining historical and policy study with empirical research from a qualitative study of regional elites, this book offers an original and timely insight into the progress of devolution of governance in England. With particular interest in how governments have tried and continue to engage English people in subnational democratic processes while dealing with the realities of governance, it uses in-depth interviews with key figures from three English regions to get the inside view of how these processes are seen by the regional and local political, administrative, business, and voluntary sector elites who have to make policies work in practice. Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter, the authors look in detail at some of the key policies of the incumbent Coalition Government, such as City Regions and Localism, and their implementation. Finally, they consider the implications of the existing situation and speculate on possible issues for the future. The Impact of Networks on

Unemployment J. M. Hurst, 2016-10-12 This book investigates why networks some with joined up governance remits appeared ineffective in handling neighbourhood unemployment even in periods when the national unemployment levels dropped It deploys a multi theoretical and methodological framework to investigate this empirical puzzle and to test and analyse the causal factors influencing network outcomes Chapters examine network concepts network theories outcome indicators the historical infrastructure and management of unemployment policy and governing network trends in post war urban regeneration interventions Comparative network case studies offer empirical evidence and a high degree of local variation Mixed methods qualitative and quantitative approaches including social network analysis uncover formal and informal networks and eighty six interviews in two English local authorities with persistent unemployment give voice to network practitioner experiences Findings explain why sub optimal network outcomes prevail and operational difficulties persist on the ground Students and academics professionals and activists can use the results to challenge network governance theories and the policy status quo
