J. O'Neill, Andrew Bowie, 2008-02-02 Interleukins are a family of proteins that regulate the maturation differentiation or activation of cells involved in immunity and inflammation and belong to a broader family termed cytokines Collectively these proteins are the key orchestrators of host defense and the response to tissue injury There are currently 23 different interleukins numbered from IL 1 to IL 23 although the full extent of the interleukin family will only become clear upon analysis of the human genome sequence Most important interleukins are central to the pathogenesis of a wide range of diseases that involve an immune component including such conditions as rheumatoid arthritis multiple sclerosis ulcerative colitis psoriasis and asthma Interleukins have also been implicated in other conditions including cancer migraine myocardial infarction and depression In essence when cells are activated by interleukins a program of gene expression is initiated in the target cell that alters the cell's phenotype leading to enhanced immune reactivity inflammation and or proliferation Interleukins are therefore at the core of the cellular basis for many diseases They are the subject of intense investigation by biomedical researchers and the targeting or use of interleukins in the clinic is proceeding apace Approaches such as targeting IL 4 in asthma or IL 1 in joint disease are being pursued and it is likely that in the next 5 10 years a number of new therapies based on either inhibiting or administering interleukins will be available Histopathologic Techniques, 2006 Rodent Quality Control: Genes and Bugs Fernando Benavides, Axel Kornerup Hansen, 2024-08-12 This book shows how and why quality assurance programmes should be implemented in laboratory rodent facilities to monitor animal health and genetic status It covers common practice to assure the desired level of microbiological and genetic surveillance of both genetically standardized and genetically altered laboratory mice and rats In particular the book introduces readers to the standardized genetic nomenclature and provides step by step protocols for genetic monitoring of the animals International standards of health monitoring programs are discussed and statistical aspects thereof are explored Furthermore the book reviews common infectious diseases in laboratory rodents and guides the reader in monitoring the animals health status through application of current diagnostic methods This book addresses researchers technicians and zookeepers working in laboratory rodent facilities *Autopsy Pathology* Walter E.
