

Educational psychology

- Educational psychology is the study of human learning. The study of learning processes, both cognitive and affective, allows researchers to understand individual differences in behavior, personality, intellect, and self- concept. The field of educational psychology heavily relies on testing, measurement, assessment, evaluation, and training to enhance educational activities and learning processes. ¹ This can involve studying instructional processes within the classroom setting.
- Educational psychology can in part be understood through its relationship with other disciplines. It is informed primarily by [psychology](#), bearing a relationship to that discipline analogous to the relationship between [medicine](#) and [biology](#). It is also informed by [neuroscience](#). Educational psychology in turn informs a wide range of specialities within educational studies, including [instructional design](#), [educational technology](#), curriculum development, [organizational learning](#), [special education](#) and [classroom management](#). Educational psychology both draws from and contributes to [cognitive science](#) and the [learning sciences](#).
