Voor Rogier Een Bundel Opstellen Van Oudleerlingen Bij Zijn Afscheid:

English Students at Leiden University, 1575-1650 Daniela Prögler, 2016-05-13 The oldest and most renowned Dutch university Leiden was an attractive proposition for travelling foreign students in the seventeenth and eighteenth centuries. Alongside offering an excellent academic program and outstanding facilities Leiden was also able to cater to the desires of noble students providing various extra curricular activities. Leiden was the most popular continental university among English students and this book investigates the 831 English students who studied there between 1575 and 1650. The preference of English students for Leiden was on the one hand related to close Anglo Dutch relations of the period and these are investigated with respect to politics, economy, religion, culture as well as to the large stranger communities residing in the respective countries. On the other hand Leiden's attraction resulted from its academic achievements which are traced back to the conditions in the United Provinces, the limited influence of the Calvinist Church, Leiden's professors as well as the university's facilities. The core of this study is an exhaustive quantitative study of the composition of the Leiden student population in general and that of its English segment in particular. Information is provided on the duration of the studies of English students at Leiden, their age, social background and fields of study. We learn about the careers of English students both prior to and after their time at Leiden and of the motivation that led the English to choose Leiden over other continental universities. More than a study of one group of students at one university, this book is a valuable contribution to the history of early modern universities and will appeal to a wide international readership interested in cultural and intellectual history as well as in Anglo Dutch relations.

Patrons of the Old Faith Jaap Geraerts, 2018-09-24 *Patrons of the Old Faith* is the first full length study on the Catholic nobility in the Dutch Republic. Based on a detailed prosopographical analysis and through the examination of their marriage strategies, interaction with Protestants, religiosity and contributions to the Holland Mission, Jaap Geraerts shows how the behaviour of the Catholic nobility was highly distinctive and differed from their co religionists and Protestant peers as it was influenced by a specific set of noble and Catholic values. Due to the synthesis of their noble and confessional identities the Dutch Catholic nobility in Utrecht and Guelders acted as patrons of their faith and were instrumental for the survival of Catholicism in the Dutch Republic.

Liberty and Religion: Church and State in Leiden's Reformation, 1572-1620 Christine Kooi, 2021-10-25 Leiden was the second largest city of the early modern Dutch Republic. This city became officially Protestant in 1572 but it took fifty years before the Reformed Church settled completely into the city's polity and society. This was largely due to disagreements between the city's ruling elites and the Reformed leaders about how much independence the church should enjoy. This book examines the establishment and early history of the Reformed community of Leiden. The evolution of the controversy between church and state is examined from the 1570s during the Dutch Revolt to the early 1620s, the beginning of the Dutch Republic's Golden Age. It also examines the consequences of this controversy for Leiden's non Reformed confessions, especially Catholics, Lutherans and Mennonites, and

The Princes of Orange Herbert H. Rowen,1990-09-20 This major study provides the first comprehensive assessment of an important European institution the Stadholderate of the Dutch Republic Professor Rowen looks at the career of each Prince of Orange in turn from William I The Silent to the last and saddest William V examining their roles as Stadholder and interweaving their personal lives and characters with the development of the institution Without engaging in psycho history Rowen treats the individual personality of each Stadholder as a significant factor and shows how the Stadholderate contributed to a distinctive political and constitutional coloration that rendered the United Provinces unique in Europe The work assesses the contribution of the Stadholderate to the rise and subsequent fall of the Dutch Republic as one of the great powers of early modern Europe and analyses each prince within his contemporary context avoiding the highly present minded approach of many of the Republic s subsequent historians The Princes of Orange is thus neither a work of hagiography glorifying the Dutch royal house nor a piece of destructive iconoclasm but an authoritative account of a most unusual political dynastic and diplomatic institution
