Voyage Visions In Color And Form

Michal Rosen-Zvi

Voyage Visions In Color And Form:

Esthetics in Dentistry Ronald E. Goldstein, 2014-06-30 Esthetic dentistry is the ultimate challenge for the restorative dentist. A restoration must not only look good, it must also function well and endure the test of time. Esthetics in Dentistry has been an important resource in the practice of general dentistry and orthodontics for more than a quarter century. This full colour revision of the original classic contains an incredible number of advances in techniques and materials. Dr. Ronald Goldstein presents the principles, communication techniques, and treatment methods for selecting patients and creating esthetic restorations. Treatments include cosmetic contouring, bleaching, bonding, etched porcelain restorations, and crown restorations.

Visions into Voyages for Planetary Science in the Decade 2013-2022 National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Review of Progress Toward Implementing the Decadal Survey Vision and Voyages for Planetary Sciences, 2018-11-30. In spring 2011, the National Academies of Sciences Engineering and Medicine produced a report outlining the next decade in planetary sciences. That report, titled Vision and Voyages for Planetary Science in the Decade 2013-2022, and popularly referred to as the decadal survey, has provided high level prioritization and guidance for NASA's Planetary Science Division. Other considerations such as budget realities, congressional language in authorization and appropriations bills, administration requirements, and cross division and cross directorate requirements, notably in retiring risk or providing needed information for the human program, are also necessary inputs to how NASA develops its planetary science program. In 2016, NASA asked the National Academies to undertake a study assessing NASA's progress at meeting the objectives of the decadal survey. After the study was underway, Congress passed the National Aeronautics and Space Administration Transition Authorization Act of 2017, which called for NASA to engage the National Academies in a review of NASA's Mars Exploration Program. NASA and the Academies agreed to incorporate that review into the midterm study. That study has produced this report, which serves as a midterm assessment and provides guidance on achieving the goals in the remaining years covered by the decadal survey, as well as preparing for the next decadal survey, currently scheduled to begin in 2020.

Voyage Claude Sieber, 1994-01-01. This unique and fascinating book, filled with brilliant photographs, offers a journey into the cosmos of the natural tooth. With cross sections and other unusual perspectives, these photographs demonstrate the unique structure and form of each tooth and their interplay with light reflection and absorption, both of which play decisive roles in the reconstruction of the tooth. Indeed, this understanding has greatly advanced the development and handling of new dental ceramics. The author lures us into an extraordinary world of photography by which we experience the inner life and beauty of the natural tooth. This excellently designed volume will be of interest to not only dentists and dental technicians but to anyone interested in the beauty of nature.
