Ramady, 2017-10-30

This book discusses the strategic shift in ownership of Aramco, the Saudi Arabian Oil Company and its potential impact on Aramco's role in a post privatized world. Scheduled to become an IPO in 2018, Aramco is on the verge of becoming the largest IPO on the market. As the world's largest oil and gas company, Aramco's impending privatization has important implications for the world's petroleum market. This book therefore undertakes an analysis of Aramco, examining its history, its current role in Saudi Arabia's economy and its future role as an IPO. The chapters highlight the likely outcomes for Aramco in proceeding with its planned IPO and privatization as well as the various policy options and models available to it by drawing on the privatization of other national oil companies in Norway, Russia, Brazil and China. The book also explores the complexities that will be involved in transforming Saudi Aramco to a privatized company, albeit with significant government oversight and control and addresses key questions on the issues likely to be faced such as IPO pricing, the listing domain and market capacity and potential stakeholders. As such, this book will be of interest to academic researchers studying energy economics, energy policy and the political economy of the Middle East as well as private sector decision makers in energy related fields, international organizations, international oil companies, energy commodity traders and public sector energy policy makers with interest in Saudi Arabia and Aramco's IPO. *Regulating Primary Markets in the Capital Markets Union* Konstantinos Serdaris, 2025-01-09. Stay ahead of the curve with this essential book offering a concise, comprehensive and up to date analysis of the Prospectus Regulation including its recent amendment by the EU Listing Act and the pathbreaking Regulation on European Crowdfunding Service Providers (ECSPR). Placing the discussion in the context of the Capital Markets Union (CMU), this book provides a fresh and insightful perspective on the ever evolving regulatory landscape of EU primary capital

markets setting out a practical roadmap for achieving effective and inclusive regulation. With a keen focus on the dynamic relationship between legal uniformity and differentiation, the book addresses 2 pivotal questions: how can the imperative of investor protection be balanced with the goal of providing businesses with improved and cost effective access to EU primary securities markets, and how can the pursuit for greater unification be practically reconciled with the growing demand for regional solutions in a post Brexit era. Unveiling a unique normative framework, the book provides a holistic perspective, it explores the underlying objectives and intricate complexities of the CMU, critically evaluates the transformative potential of regulatory actions, sheds light on potential inconsistencies and offers insightful suggestions for future reforms. A must read for policymakers, scholars, legal practitioners and anyone seeking to comprehend the current and emerging challenges in the regulation of EU primary capital markets.

Revisiting Crimes of the Powerful Steven Bittle, Laureen Snider, Steve Tombs, David Whyte, 2018-06-13. Frank Pearce was the first scholar to use the term crimes of the powerful. His groundbreaking book of the same name provided insightful critiques of liberal orthodox criminology, particularly in relation to labelling theory and symbolic interactionism, while making important contributions to Marxist understandings of the complex relations between crime, law and the state in the reproduction of the capitalist social order. Historically, crimes of the powerful were largely neglected in crime and deviance studies, but there is now an important and growing body of work addressing this gap. This book brings together leading international scholars to discuss the legacy of Frank Pearce's book and his work in this area, demonstrating the invaluable contributions a critical Marxist framework brings to studies of corporate and state crimes nationally, internationally and on a global scale. This book is neither a hagiography nor a review of random areas of social scientific interest. Instead, it draws together a collection of scholarly and original articles which draw upon and critically interrogate the continued significance of the approach pioneered in *Crimes of the Powerful*. The book traces the evolution of crimes of the powerful empirically and theoretically since 1976, shows how critical scholars have integrated new theoretical insights derived from post structuralism, feminism and critical race studies, and offers perspectives on how the crimes of the powerful and the enormous ongoing destruction they cause can be addressed and resisted.

might weaken the Government's credibility in seeking to establish a stable tax regime. The Committee was pleased with the further reduction in corporation tax announced in the Budget as this was a positive measure aimed at boosting growth. With regard to Enterprise Zones it may have some effect in reviving particular areas but it was noted that almost all the evidence received is unsure about the extent to which they will contribute to UK growth. It is clear that there is still much to be done on the details of this policy.
