The World Of The Quantum Science For Kids Book 6:

Endophysics Otto E. Rössler, 1998 What do yin yang and the Lorenzian butterfly in chaos have in common The outside perspective Only by going very far outside beyond the end of the world do certain aspects of the world become intelligible The computer makes it possible today to go after the interface What does the world look like if you are an internally chaotic part Is the world just a difference an interface a forcing function Is it possible to identify those features which exist only from the inside How far does the meta unmaskability go Is quantum mechanics a virtual reality Can the micro interface be manipulated Such questions are tackled in this fascinating book

Advances in the Interplay Between Quantum and Gravity Physics Peter G. Bergmann, V. de Sabbata, 2002-04-30 In this XVII Course of the International School of Cosmology and Gravitation devoted to ADVANCES IN THE INTERPLAY BETWEEN QUANTUM AND GRAVITY PHYSICS we have considered different aspects of the influence of gravity on quantum systems In order to achieve this aim in many lectures seminars and discussions we have strengthened the interplay between gravity and quantum systems starting from the situation in the early universe based on astrophysical observations up to the earthly based experiments with atom interferometry for probing the structure of space time Thus we have had timely lectures on the quantum field and horizon of a black hole including reviews of the problem of black holes thermodynamics and entropy quantum information quantum black holes quantum evaporation and Hawking radiation recent advances in stochastic gravity We have also discussed quantum fluctuations in inflationary universe quantum effects and reheating after inflation and superplanckian energies in Hawking radiation In this regard the subject of spinors in purely affine space time and Dirac matter according to Weyl in the generalized theory of gravitation were developed The dualism between space time and matter has been deeply analyzed in order to see why for general relativity this is an obstacle for quantization of the theory Also canonical Gravity and Mach's principle torsion and curvature as commutator for Quantum Gravity and Dirac Geometry of real space time were analysed together with the problem of 5 Dimensional Projective Unified Field theory and Multidimensional Gravity and Cosmology
