from the scholarly article to the video game and online video clip and the connections and differences between mediated representations of the Black Death are considered The Black Death is one of the most well known aspects of the medieval world and this study of its associated memories and myths reveals the depth and complexity of interactions between the distant and recent past

Forty Signs of Rain Kim Stanley Robinson, 2005-07-26 The bestselling author of the classic Mars trilogy and *The Years of Rice and Salt* presents a riveting new trilogy of cutting edge science international politics and the real life ramifications of global warming as they are played out in our nation's capital and in the daily lives of those at the center of the action Hauntingly yet humorously realistic here is a novel of the near future that is inspired by scientific facts already making headlines When the Arctic ice pack was first measured in the 1950s it averaged thirty feet thick in midwinter By the end of the century it was down to fifteen One August the ice broke The next year the breakup started in July The third year it began in May That was last year It's a muggy summer in Washington D C as Senate environmental staffer Charlie Quibler and his scientist wife Anna work to call attention to the growing crisis of global warming But as these everyday heroes fight to align the awesome forces of nature with the extraordinary march of technology fate puts an unusual twist on their efforts one that will place them at the heart of an unavoidable storm

Sideways in Time Glyn Morgan, C. Palmer-Patel, 2019 This important collection of essays acknowledges the long and distinctive history of the alternate history genre whilst also revelling in its vitality adaptability and contemporary relevance with many of the chapters discussing late twentieth and early twenty first century texts which have previously received little or no sustained critical analysis

Science Fiction and the Historical Novel Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches *Science Fiction and the Historical Novel* asks what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present
