Working Memory and Language in the Modular Mind John Truscott, 2022-06-16. The book explores two fundamental aspects of the human mind and their relation to one another. The first is the way that information is put to use in the mind. When we are doing a mental arithmetic problem, for example, how do we bring the relevant bits of information to mind and hold them there while carrying out the series of calculations? This is working memory, the subject of an enormous research literature in psychology, neuroscience and a great many other disciplines. Characterizing the working memory process is now a major part of efforts to understand the human mind. How we characterize this process depends of course on how we characterize the human mind as a whole. In particular, is the mind made up of a number of distinct units, each carrying out a specialized function? There is considerable reason to say that it is, and this modular view of the mind has become prominent in a great deal of academic work, notably in cognitive neuroscience, with important implications for our understanding of how working memory works. But these implications have received surprisingly little consideration to this point. The aim of the book is to explore this relation between working memory and modularity, first in general terms and then using a specific modular view of the mind: the Modular Cognition Framework. The ideas are illustrated and further developed through an application to language and especially second language acquisition and use.

Cognitive and Educational Psychology for TESOL Andrzej Cirocki, Bimali Indrarathne, Sharon McCulloch, 2024-08-19. This volume has been written specifically with TESOL teacher educators, practitioners and classrooms in mind. It is divided into three sections: cognitive aspects of language learning, individual differences and language learning difficulties and challenging behaviours. Structured in this way, it enables TESOL teacher educators and practitioners to better understand how language learners process and retain new information, improving their overall ability to learn and remember. In addition to supporting TESOL teacher educators and practitioners in promoting effective language learning, this volume explains individual differences among language learners and the importance of developing learners' emotional, social and behavioural skills while addressing learning difficulties, disorders, disabilities and challenging behaviours whenever required. The individual chapters are written in an accessible style to enable readers to explore various psychological concepts in their pedagogical practice by engaging in reflective teaching through action research. This volume is a vital resource for pre and in-service language teachers and will encourage language teacher educators to reassess their existing practices.
