Greene, 2011-12-31 *Human Behavior Theory and Social Work Practice* remains a foundation work for those interested in the practice and teaching of social work. Roberta Greene covers theoretical areas and individual theorists including classical psychoanalytic thought, Eriksonian theory, Carl Rogers, cognitive theory, systems theory, ecological perspectives, social construction, feminism, and genetics. She discusses the historical context, its philosophical roots, and major assumptions of each theory. The general theme which distinguishes this volume is that the person-in-environment perspective has been a central influence in the formation of the profession's knowledge base as well as its approach to practice. Greene provides perspective on how individuals and social systems interact. This book examines how social workers can use theory to shape social work practice by increasing his or her understanding of and potential for enhancing human well-being. Greene covers the relationship between human behavior theory and professional social work practice. She also explores the challenges and limitations of each theory and addresses the following issues: how the theory serves as a framework for social work practice; how the theory lends itself to an understanding of individual, family, group, community, or organizational behavior; what the implications are of the theory for social work interventions or practice strategies; and what role it proposes for the social worker as a change agent. Throughout the profession's history, social workers have turned to a number of theoretical approaches for the organizing concepts needed to define their practice base. The aims of social work to improve societal conditions and to enhance social functioning of and between individuals, families, and groups are put into action across all fields of practice and realized through a variety of methods in a range of settings. This third edition, completely revised, represents a fundamental contribution to the field and like its predecessors will be widely used as a basic text. **Modern**
