Unnever, Shaun L. Gabbidon, 2011-03-01 A little more than a century ago the famous social scientist W E B Du Bois asserted that a true understanding of African American offending must be grounded in the real conditions of what it means to be black living in a racial stratified society Today and according to official statistics African American men about six percent of the population of the United States account for nearly sixty percent of the robbery arrests in the United States To the authors of this book this and many other glaring racial disparities in offending centered on African Americans is clearly related to their unique history and to their past and present racial subordination Inexplicably however no criminological theory exists that fully articulates the nuances of the African American experience and how they relate to their offending In readable fashion for undergraduate students the general public and criminologists alike this book for the first time presents the foundations for the development of an African American theory of offending *A Demographic Analysis of East Africa* Mette Mønsted, Parveen Walji, 1978 **Theorising Development in Africa** Munyaradzi Mawere, 2017-12-17 How come Africa is so underdeveloped when it is one of the richest continents on earth Indeed Africa is a paradox it is poor and rich at the same time Resource wise Africa is among the top richest continents in the world yet development wise it is the poorest of all continents This paradox desperately needs comprehensive theoretical unpacking and rethinking if Africa is to achieve breakthroughs to the multifaceted development related problems that have haunted it since the beginning of its unequal encounters with Europe Regrettably current Eurocentric development theories fall short on several fronts The need for a comprehensive body of knowledge theories and models from the perspective of Africans persists in urgency The present volume is an attempt to theorise Africa's under development with a view to provide a sustainable enduring framework of operations that will arrest the elusive predicament of the continent while taking it forward from its current position of passivity It rethinks and reimagines a number of externally imposed problematic mechanisms used unconsciously in Africa with the intention to raise awareness and foster critical thinking in scholars and scholarship on African development With its predicament oriented theorising the book is a pacesetter on how to think and research Africa's under development It is also an invaluable asset for social scientists policy makers development practitioners civil society activists and politicians **Handbook of African American Psychology** Helen A.
