Ryckman, 2004 Ryckman U of Maine reviews the basic concepts and principles of the major theories of personality and assesses how well they meet criteria for judging their scientific worth The eighth edition includes new added revised material on the role of values in personality development religion in huma The Capitalist Personality Christopher S. Swader, 2013-01-04 Modern capitalism favors values that undermine our face to face bonds with friends and family members Focusing on the post communist world and comparing it to more developed societies this book reveals the mixed effects of capitalist culture on interpersonal relationships While most observers blame the egoism and asocial behavior found in new free market societies on their communist pasts this work shows how relationships are also threatened by the profit orientations and personal ambition unleashed by economic development Successful people in societies as diverse as China Russia and Eastern Germany adjust to the market economy at a social cost relaxing their morals in order to obtain success and succumbing to increased material temptations to exploit relationships for their own financial and professional gain The capitalist personality is internally troubled as a result of this sellout but these qualms subside as it devalues intimate qualitative bonds with others This book also shows that post communists are similarly individualized as people living in Western societies Capitalism may indeed favor values of independence creativity and self expressiveness but it also rewards

self centeredness consumerism and the stripping down of morality As is the case in the West capitalist culture fosters an internally conflicted and self centered personality in post communist societies **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1985 **Personality Theories Workbook** Donna Musialowski Ashcraft,2003 This unique workbook was written for the undergraduate Personality course where professors are looking for activities to help students learn and apply personality theories to real life examples The workbook is geared toward personality courses that are theories based as opposed to research based Because the cases explored are those based on normal behavior as opposed to abnormal behavior this workbook is especially useful While most personality texts present the major concepts of personality theories they don t help students apply the theories they have learned or to use the theories to understand other examples on their own This workbook will help students do just that and is the perfect complement to any Personality text

Mimetic Criticism and the Gospel of Mark Joel L. Watts,2013-02-01 What if the story of Jesus was meant not just to be told but retold molded and shaped into something new something present by the Evangelist to face each new crisis The Evangelists were not recording a historical report but writing to effect a change in their community Mark was faced with the imminent destruction of his tiny community a community leaderless without Paul and Peter and who witnessed the destruction of the Temple now another messianic figure was claiming the worship rightly due to Jesus The author of the Gospel of Mark takes his stylus in hand and begins to rewrite the story of Jesus to unwrite the present rewrite the past to change the future Joel L Watts moves the Gospel of Mark to just after the destruction of the Temple sets it within Roman educational models and begins to read the ancient work afresh Watts builds upon the historical criticisms of the past but brings out a new way of reading the ancient stories of Jesus and attempts to establish the literary sources of the Evangelist

Psychology as Religion Paul C. Vitz,1994 This is a virtually rewritten second edition of New York University Professor Paul Vitz s profoundly important analysis of modern psychology Vitz maintains that psychology in our day has become a religion a secular cult of self and has become part of the problem of modern life rather than part of its resolution Method in Madness Jutta Emma Fortin,2005 The language of the fantastic left its mark upon many different thinkers in 19th century Europe Marx s comparison of consumer goods to fetish objects works by Villiers de l Isle Adam or other novelists about machines that assume lives of their own or the diagnoses of psychological illness offered by doctors in Maupassant s tales all blur the lines between scientific description and beliefs in the magical Building upon a wealth of critical studies devoted to the fantastic and upon Freud s theory of the unconscious Jutta Fortin proposes that many classic stories of the fantastic undermine basic psychological mechanisms that are designed to help their users cope with shocking or disturbing events By defining five of these defence mechanisms and analyzing stories by eight writers that both illustrate and subvert such mechanisms Dr Fortin offers reasons why fantastic stories appealed to those readers who wished to better understand human motivations **BOOK JACKET**
