The Soviet Union - Federation or Empire? Tania Raffass, 2012-06-14 The Soviet Union is often characterised as nominally a federation but really an empire liable to break up when individual federal units which were allegedly really subordinate colonial units sought independence This book questions this interpretation revisiting the theory of federation and discussing actual examples of federations such as the United States arguing that many federal unions including the United States are really centralised polities It also discusses the nature of empires nations and how they relate to nation states and empires and the right of secession highlighting the importance of the fact that this was written in to the Soviet constitution It examines the attitude of successive Soviet leaders towards nationalities and the changing attitudes of nationalists towards the Soviet Union Overall it demonstrates that the Soviet attitude to nationalities and federal units was complicated wrestling in a similar way to many other states with difficult questions of how ethno cultural justice can best be delivered in a political unit which is bigger than the national state

Citizenship, Territoriality, and Post-Soviet Nationhood Maxim Tabachnik, 2019-04-02 This book seeks to understand the politics of nationalism in the buffer zone between Russia and the West Azerbaijan Georgia and Moldova as well as Russia itself It problematizes the official ways of defining the nation and thus citizenship in the light of frozen ethno territorial conflicts and broader geopolitical discrepancies between Russia and the West The author analyzes the politics of birthright citizenship policy in these countries and rejects the assumed connection between territorial nation building and liberal democracy The project will interest academics and graduate students in the fields of comparative and post Soviet politics nationalism and citizenship and international relations policy professionals
