Scott A. Miller

Theory Of Mind And Literature:

Theory of Mind and Literature Paula Leverage, Howard Mancing, Richard Schweickert, 2010-01-15 Theory of Mind is what enables us to put ourselves in another's shoes. It is mindreading, empathy, creative imagination of another's perspective. In short, it is simultaneously a highly sophisticated ability and a very basic necessity for human communication. Theory of Mind is central to such commercial endeavors as market research and product development, but it is also just as important in maintaining human relations over a cup of coffee. Not surprisingly, it is a critical tool in reading and understanding literature, which abounds with characters, situations, and other people's shoes. Furthermore, it is becoming increasingly apparent that reading literature also hones these critical mindreading skills. Theory of Mind and Literature is a collection of nineteen essays by prominent scholars, linguists, cognitive scientists, and philosophers working in the cutting-edge field of cognitive literary studies, which explores how we use Theory of Mind in reading and understanding literature. **Theory of Mind and**

Why We Read Fiction offers a lucid overview of the most exciting area of research in contemporary cognitive psychology known as Theory of Mind and discusses its implications for literary studies. It covers a broad range of fictional narratives from Richardson's *Clarissa*, Dostoyevski's *Crime and Punishment*, and Austen's *Pride and Prejudice* to Woolf's *Mrs. Dalloway*, Nabokov's *Lolita*, and Hammett's *The Maltese Falcon*. Zunshine's surprising new interpretations of well-known literary texts and popular cultural representations constantly prod her readers to rethink their own interest in fictional narrative. Written for a general audience, this study

Miller, 2016-02-22 Parenting and Theory of Mind represents the conjunction of two major research literatures in child psychology One is longstanding The question of how best to rear children has been a central topic for psychology ever since psychology began to develop as a science The other research literature is a good deal younger though quickly expanding Theory of mind ToM has to do with understanding of the mental world what people children in particular know or think about mental phenomena such as beliefs desires and emotions An important question that research on TOM addresses is where do children s ToM abilities come from In particular how do children s experiences shape their development If we know the formative experiences that underlie ToM then we may be able to optimize this important aspect of development for all children The last 15 or so years have seen a rapid expansion of the literature on the social contributors to ToM including hundreds of studies directed to various aspects of parenting These studies have made clear that parents can be important contributors to what their children understand about the mental world This is the first book to comprehensively bring together the literature on ToM and parenting summarizing what we know about how parenting contributes to one of the most important outcomes in cognitive development and outlining future directions for research in this growing area
