Thucydides And The Idea Of History New Directions In Classics:

Thucydides and the Idea of History Neville Morley, 2014-03-27 From the eighteenth century onwards the ancient Greek writer Thucydides c 460 c 395 BCE was viewed as the most important classical historian He was acclaimed not only as a vital source for reconstructing antiquity but as a purveyor of timeless political wisdom His name is almost inescapable in nineteenth century discussions of history's nature and purpose And his spirit or the image of him constructed by German historicists remains a significant presence in more recent debates about historical method It is remarkable then that the trajectory of Thucydides' modern reception has never been properly studied Neville Morley here sets right that neglect He examines different aspects of the reception of Thucydides within modern western historiography casting fresh light on ideas about history and the historian in the contemporary world His nuanced readings illuminate changing notions of the nature and purpose of history and of the historian's proper task This latest volume in the I B Tauris New Directions in Classics series makes a bold and significant contribution to understandings of how to reclaim the past **Antiquity and the Meanings of**

Time Duncan F. Kennedy, 2013-05-30 Society and contemporary culture seem forever fascinated by the topic of time In modern fiction Ian McEwan's *The Child in Time* and Martin Amis's *Time's Arrow* have led the way in exploring the human condition in relation to past present and future In cinema several cultural texts *Memento* *Minority Report* *The Hours* have similarly reflected a preoccupation with temporality and human experience And in the sphere of politics debates about the end of history prompted by Francis Fukuyama indicate that how we live is deeply determined by our relationship not only to place but also to the passing of time But what did the ancients think about time Is our interest in chronology a relatively recent phenomenon Or does it go further back In his major new work Duncan Kennedy indicates that our own fascination with time reckoning is by no means unique Discussing a number of key texts such as Homer's *Odyssey* Sophocles' *Oedipus Rex* Virgil's *Aeneid* and Ovid's *Metamorphoses* and imaginatively setting these side by side with modern works such as Sterne's *Tristram Shandy* and Joyce's *Ulysses* he shows that from era to era and in different ways human beings have uniformly striven to understand the unfolding of history and their relationship to it Pindar and the Sublime Robert L.

Fowler, 2022-01-13 Pindar the Theban eagle as Thomas Gray famously called him has often been taken as the archetype of the sublime poet soaring into the heavens on wings of language and inspired by visions of eternity In this much anticipated new study Robert Fowler asks in what ways the concept of the sublime can still guide a reading of the greatest of the Greek lyric poets Working with ancient and modern treatments of the topic especially the poetry and writings of Friedrich Hölderlin 1770-1843 arguably Pindar's greatest modern reader he develops the case for an aesthetic appreciation of Pindar's odes as literature Building on recent trends in criticism he shifts the focus away from the first performance and the orality of Greek culture to reception and the experience of Pindar's odes as text This change of emphasis yields a fresh discussion of many facets of Pindar's astonishing art including the relation of the poems to their occasions performativity the poet's persona his

imagery and his myths Consideration of Pindar's views on divinity transcendence time and the limits of language reveals him to be not only a great writer but a great thinker

Antiquity in Print Daniel Orrells, 2024-05-16 Daniel Orrells examines the ways in which the ancient world was visualized for Enlightenment readers and reveals how antiquarian scholarship emerged as the principal technology for envisioning ancient Greek culture at a time when very few people could travel to Greece which was still part of the Ottoman Empire Offering a fresh account of the rise of antiquarianism in the 18th century Orrells shows how this period of cultural progression was important for the invention of classical studies In particular the main focus of this book is on the visionary experimentalism of antiquarian book production especially in relation to the contentious nature of ancient texts With the explosion of the Quarrel between the Ancients and the Moderns eighteenth century intellectuals antiquarians and artists such as Giambattista Vico Johann Joachim Winckelmann the Comte de Caylus James Stuart Julien David Leroy Giovanni Battista Piranesi and Pierre François Hugues d'Hancarville all became interested in how printed engravings of ancient art and archaeology could visualize a historical narrative These figures theorized the relationship between ancient text and ancient material and visual culture theorizations which would pave the way to foundational questions at the heart of the discipline of classical studies and neoclassical aesthetics

Preposterous Virgil Juan Christian Pellicer, 2022-06-02 This study in reception develops close readings of English literature as means of interrogating Virgil's texts Through four case studies bookended by wide ranging introductory and concluding chapters this book shows how interpreting the Eclogues Georgics and Aeneid through modern responses can serve to focus on aspects of Virgil that would otherwise be differently perceived or else escape notice altogether Juan Christian Pellicer probes our perceptions of the three Virgilian genres pastoral georgic and epic and analyzes the ways in which modern reconfigurations of these genres can inform our readings of Virgil's works as well as help us realize how our own ideas about Virgil reflect the literary receptions through which we approach his texts This book offers a practical demonstration of classical reception and its value as a critical procedure By testing the value of modern responses to Virgil as means by which to read his texts Pellicer critically examines a central tenet of reception studies of classical authors namely that our understanding of their work can benefit from the receptions through which we perceive them The reader will find Virgil's texts reconfigured in challenging new ways and will find new appreciations of the classical traditions that inform key texts in the English canon
