Trier Stadt Mittelalter Medieval City:

The Later Medieval City David Nicholas, 2014-06-17 The Later Medieval City 1300 1500 the second part of David Nicholas's ambitious two volume study of cities and city life in the Middle Ages fully lives up to its splendid precursor The Growth of the Medieval City Like that volume it is fully self sufficient though many readers will want to use the two as a continuum This book covers a much shorter period than the first That traced the rise of the medieval European city system from late Antiquity to the early fourteenth century this offers a portrait of the fully developed late medieval city in all its richness and complexity David Nicholas begins with the economic and demographic realignments of the last two medieval centuries These fostered urban growth raising living standards and increasing demand for a growing range of urban manufactures The hunger for imports and a shortage of coin led to sophisticated credit mechanisms that could only function through large cities But if these changes brought new opportunities to the wealthy they also created a growing problem of urban poverty violence became endemic in the later medieval city Moreover although more rebellions were sparked by taxes than by class conflict class divisions were deepening Most cities came to be governed by councils chosen from guild members and most guilds were dominated by merchants The landowning elite that had dominated the early medieval cities of the first volume still retained its prestige but its wealth was outstripped by the richer merchants while craftsmen who had little political influence were further disadvantaged as access to the guilds became more restricted The later medieval cities developed permanent bureaucracies providing a huge range of public services and they were paid for by sophisticated systems of taxation and public borrowing The survival of their fuller richer records allow us not only to apply a more statistical approach but also to get much closer to the splendours and squalors of everyday city life than was possible in the earlier volume The book concludes with a set of vibrant chapters on women and children and religious minorities in the city on education and culture and on the tenor of ordinary urban existence Like its predecessor this book is massively and vividly documented Its approach is interdisciplinary and comparative and its examples and case studies are drawn from across Europe from France England Germany the Low Countries Iberia and Italy with briefer reviews of the urban experience elsewhere from Baltic to Balkans The result is the most wide ranging and up to date study of its multifaceted subject It is a formidable achievement

The Growth of the Medieval City David M Nicholas, 2014-06-17 The first part of David Nicholas's massive two volume study of the medieval city this book is a major achievement in its own right It is also fully self sufficient though many readers will want to use it with its equally impressive sequel which is being published simultaneously In it Professor Nicholas traces the slow regeneration of urban life in the early medieval period showing where and how an urban tradition had survived from late antiquity and when and why new urban communities began to form where there was no such continuity He charts the different types and functions of the medieval city its interdependence with the surrounding countryside and its often fraught relations with secular authority The book ends with the critical changes of the late

thirteenth century that established an urban network that was strong enough to survive the plagues famines and wars of the fourteenth and fifteenth centuries

Lords and Towns in Medieval Europe Howard B. Clarke, Annegret Simms, 2017-07-14 This volume is based on possibly the biggest single Europe wide project in urban history In 1955 the International Commission for the History of Towns established the European historic towns atlas project in accordance with a common scheme in order to encourage comparative urban studies Although advances in urban archaeology since the 1960s have highlighted the problematic relationship between the oldest extant town plan and the actual origins of a town the large scale cadastral maps as they have been made available by the European historic towns atlas project are still necessary if we want to understand the evolution of the physical form of our towns By 2014 the project consisted of over 500 individual publications from over 18 different countries across Europe Each atlas comprises at least a core map at the scale of 1:2500 analytical maps and an explanatory text The time has come to use this enormous database that has been compiled over the last 40 years This volume itself based on a conference related to this topic that was held in the Royal Irish Academy in Dublin in 2006 takes up this challenge The focus of the volume is on the question of how seigneurial power influenced the creation of towns in medieval Europe and of how this process in turn influenced urban form Part I of the volume addresses two major issues the history of the use of town plans in urban research and the methodological challenges of comparative urban history Parts II and III constitute the core of the book focusing on the dynamic relationship between lordship and town planning in the core area of medieval Europe and on the periphery In Part IV the symbolic meaning of town plans for medieval people is discussed Part V consists of critical contributions by an archaeologist an art historian and an historical geographer By presenting case studies by leading researchers from different European countries this volume combines findings that were hitherto not available in English A comparison of the English and German bibliographies attached to this volume reveals some interesting insights as to how the focus of research shifted over time The book also shows how work on urban topography integrates the approaches of the historian archaeologist and historical geographer The narrative of medieval urbanization becomes enriched and the volume is a genuine contribution to European studies

The Later Medieval City, 1300-1500 David Nicholas, 1997 That traced the rise of the medieval European city system from late antiquity to the early fourteenth century this offers a portrait of the fully developed later medieval city in all its richness and complexity

Universities and Schooling in Medieval Society Courtenay, Jürgen Miethke, 2021-10-01 The 10 papers in this volume examine university and pre university education in the 14th to 16th centuries in Germany Italy France and England Topics covered include the recruitment and support of students studying abroad social status careers of graduates university rituals the profession of schoolmaster and the relation of the studia to the crown Contributors include William J Courtenay Rainer Chr Schwinges Klaus Wriedt Frank Rexroth Darleen Pryds Helmut G Walther Thomas Sullivan O S B Martin Kintzinger Jo Ann Hoepfner Moran Cruz and Jürgen Miethke **Routledge Revivals: Medieval Germany (2001)** John M.

Jeep, 2017-07-05 First published in 2001 *Medieval Germany* An Encyclopedia provides a comprehensive guide to the German and Dutch speaking world in the Middle Ages from approximately C E 500 to 1500 It offers detailed accounts of a wide variety of aspects of medieval Germany including language literature architecture politics warfare medicine philosophy and religion In addition this reference work includes bibliographies and citations to aid further study This A Z encyclopedia featuring over 500 entries written by expert contributors will be of key interest to students and scholars as well as general readers The Mendicant Houses of Medieval London, 1221-1539 Jens Röhrkasten, 2004 The mendicant Orders had a

profound impact on urban society life and culture from the thirteenth century onwards Being engaged in extensive and ambitious pastoral activities they depended on outside support for their material existence Their influence extended into ecclesiastical as well as secular affairs leading to the creation of a network of connections to different social groups and on occasion even an involvement in politics The role of the mendicants in a medieval capital has not yet been systematically studied A first attempt to study a city of this scale is here made for London *Urban Space in the Middle Ages and the Early Modern Age* Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms **Hospitals in Communities of the Late Medieval**

Rhineland Lucy Barnhouse, 2025-10-01 From the mid twelfth century onwards the development of European hospitals was shaped by their claim to the legal status of religious institutions with its attendant privileges and responsibilities The questions of whom hospitals should serve and why they should do so have recurred and been invested with moral weight in successive centuries though similarities between medieval and modern debates on the subject have often been overlooked Hospitals legal status as religious institutions could be tendentious and therefore had to be vigorously defended in order to protect hospitals resources This status could also however be invoked to impose limits on who could serve in and be served by hospitals As recent scholarship demonstrates disputes over whom hospitals should serve and how find parallels in other periods of history and current debates

Archaeological Approaches to Medieval Europe Kathleen Biddick, 1984 In bringing together these papers Archaeological Approaches to Medieval Europe demonstrates the need for active participation of different disciplines in formulating questions about and interpretations of material culture in the Middle Ages It celebrates the coming of age of historical archaeology of which medieval archaeology is a subdiscipline The papers collected are striking for their diversity of approaches and subject matter They reflect the spirit of an open area excavation where specialists from many disciplines with diverging methodologies meet and work side by side No paper is specifically devoted to an excavation report although the majority of contributors made use of data from such reports The collection is intended primarily as a sampler but a thematic unity emerges around the potential of archaeological approaches to contribute to a political ecology of the medieval period The volume is an indispensable offering for archaeologists and historians of the Middle Ages seeking an appraisal of the state of the young discipline of medieval archaeology

The Grove Encyclopedia of Medieval Art and Architecture Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture

Medieval Cologne Joseph P. Huffman, 2024-11-18 In Anglophone literature historical questions about urban socio economic political religious and cultural development have often been answered using Anglo French Anglo Low Countries and Anglo Italian paradigms and sources Medieval Germany has been largely overlooked seen as a peripheral and irrelevant anomaly Conversely scholars from the German Rhineland have mostly remained within the traditions of civic public history and Landesgeschichte As a result they rarely engage with the historical questions raised in wider European discourses This volume challenges these historiographical propensities by offering a fresh perspective on medieval urban Germany It aims to integrate Cologne and the Rhineland more accurately and equitably into the wider histories of medieval Europe The book engages with historical questions of wider relevance across both German and European medieval histories It invites all scholars and students of

medieval Europe to utilize Cologne as a key source for their research and writing

Anticlericalism in Late Medieval and Early Modern Europe, 2021-10-11

Traditionally anticlericalism has been regarded as a significant historical factor by some historians even as the unifying focal point for the host of movements known as the Reformation of the sixteenth century In forty one essays eminent historians of culture religion and society redefine and redirect the debate regarding the scope and impact of European anticlericalism during the period 1300 1700 The meaning of reform and resentment is here clearly articulated and the sentiments are analyzed which were directed first against all levels of the Roman hierarchy and later as well against the evangelical pastor Using sources drawn from a wide variety of city and village archives of literary genres and theological tracts the articles presented here uncover the clusters of reform hope and bitter resentment directed toward parish priest monk bishop and pope in addition to the early Protestant clergy The volume highlights the continuity and discontinuity of anticlerical passion language goals and actions between the late medieval and Reformation periods
