

TRITONEQ™

INTRODUCTION

TritonEQ™ offers all of the specifications and features of the original Triton Jr., and adds a built-in AC power supply, lithium balancing circuit, and a new reversed LCD with adjustable view angle. The range of currents and cell counts make TritonEQ great for smaller sized electric flight applications. But it can still be used in various other applications, such as for Tx and Rx batteries, field batteries, and more. TritonEQ can charge, discharge, and cycle multiple types of rechargeable batteries with high output power. A Quick Reference Guide, plus state-of-the-art programming and flowcharts make TritonEQ easy to understand and use. Its very small size and light weight make TritonEQ extremely easy to transport.

It is strongly recommended to completely read this manual before use! Damage resulting from misuse or modification will void your warranty.

WARNING!! Charging lithium-based rechargeable batteries poses a risk of FIRE! NEVER treat lithium-based batteries in the same manner as other battery types. NEVER leave lithium batteries unattended while being charged! ALWAYS charge lithium-based batteries in a fireproof location! Failure to follow all care and handling instructions contained in this manual could result in quick, severe, permanent damage to the batteries and all surroundings!! Follow all safety precautions when using such batteries, as listed on pages 9-12 of this manual!
