Global Undergrounds Carlos López Galviz, Paul Dobraszczyk, Bradley L. Garrett, 2016-06-15 Rest your eyes long enough on the skylines of Delhi Guangzhou Jakarta even Chicago or London and you will see the same remarkable transformation building after building going up with the breakneck speed of twenty first century urbanization But there is something else just as transformative that you won't see sprawling networks of tunnels rooting these cities into the earth Global Undergrounds offers a richly illustrated exploration of these subterranean spaces charting their global reach and the profound but often unseen effects they have on human life The authors shine their headlamps into an astonishing diversity of manmade underground environments including subway systems sewers communications pipelines storage facilities and even shelters There they find not only an extraordinary range of architectural approaches to underground construction but also a host of different cultural meanings Underground places can evoke fear or hope they can serve as sites of memory places of work or the hidden headquarters of resistance movements They are places that can tell a city's oldest stories or foresee its most distant futures They are places ultimately of both incredible depth and breadth crucial to all of us topside who work as urban planners geographers architects engineers or any of us who take subway trains or enjoy fresh water from a faucet Indeed as the authors demonstrate the constant flux within urban undergrounds the nonstop circulation of people substances and energy serves all city dwellers in myriad ways not just with the logistics of day to day life but as a crucial part of a city's mythology

Think Global, Fear Local David Leheny, 2018-09-05 In 1999 responding to international concerns about the sexual exploitation of children the Japanese Diet voted unanimously to ban child prostitution and child pornography Two years later in the wake of 9 11 Junichiro Koizumi's cabinet radically shifted government counterterrorism policy toward new military solutions and away from an earlier emphasis on law enforcement Although they seem unrelated these two policies reveal the unintended consequences of attempts to enforce international norms at the national level In *Think Global Fear Local* David Leheny posits that when states abide by international agreements to clamp down on transnational crime and security concerns they respond not to an amorphous international problem but rather to more deeply held and proximate fears Although opponents of child prostitution and pornography were primarily concerned about the victimization of children in poor nations by wealthy foreigners the Japanese law has been

largely used to crack down on compensated dating in which middle class Japanese schoolgirls date and sometimes have sex with adults Many Japanese policymakers viewed these girls as villains and subsequent legal developments have aimed to constrain teenage sexual activities as well as to punish predatory adults Likewise following changes in the country's counterterrorism policy some Japanese leaders have redefined a host of other threats especially from North Korea as terrorist menaces requiring a more robust and active Japanese military Drawing from sources as diverse as parliamentary debate records and contemporary film and literature Leheny uses these two very different cases to argue that international norms can serve as political tools allowing states to enhance their coercive authority
