Throwing Rocks at the Google Bus Douglas Rushkoff, 2017-06-06 Why doesn't the explosive growth of companies like Facebook and Uber deliver more prosperity for everyone What is the systemic problem that sets the rich against the poor and the technologists against everybody else When protesters shattered the windows of a bus carrying Google employees to work their anger may have been justifiable but it was misdirected The true conflict of our age isn't between the unemployed and the digital elite or even the 99 percent and the 1 percent Rather a tornado of technological improvements has spun our economic program out of control and humanity as a whole the protesters and the Google employees as well as the shareholders and the executives are all trapped by the consequences It's time to optimize our economy for the human beings it's supposed to be serving In this groundbreaking book acclaimed media scholar and author Douglas Rushkoff tells us how to combine the best of human nature with the best of modern technology Tying together disparate threads big data the rise of robots and AI the increasing participation of algorithms in stock market trading the gig economy the collapse of the eurozone

Rushkoff provides a critical vocabulary for our economic moment and a nuanced portrait of humans and commerce at a critical crossroads

The People Vs Tech Jamie Bartlett, 2018-04-05 From the bestselling author of *The Dark Net* comes a book that explains all the dangers of the digital revolution and offers concrete solutions on how we can protect our personal privacy and democracy itself The internet was meant to set us free But have we unwittingly handed too much away to shadowy powers behind a wall of code all manipulated by a handful of Silicon Valley utopians ad men and venture capitalists And in light of recent data breach scandals around companies like Facebook and Cambridge Analytica what does that mean for democracy our delicately balanced system of government that was created long before big data total information and artificial intelligence In this urgent polemic Jamie Bartlett argues that through our unquestioning embrace of big tech the building blocks of democracy are slowly being removed The middle class is being eroded sovereign authority and civil society is weakened and we citizens are losing our critical faculties maybe even our free will *The People Vs Tech* is an enthralling account of how our fragile political system is being threatened by the digital revolution Bartlett explains that by upholding six key pillars of democracy we can save it before it is too late We need to become active citizens uphold a shared democratic culture protect free elections promote equality safeguard competitive and civic freedoms and trust in a sovereign authority This essential book shows that the stakes couldn't be higher and that unless we radically alter our course democracy will join feudalism supreme monarchies and communism as just another political experiment that quietly disappeared

Stakeholder Capitalism Klaus Schwab, 2021-01-27 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken But we can replace the current picture of global upheaval unsustainability and uncertainty with one of an economy that works for all people and the planet First we must eliminate rising income inequality within societies where productivity and wage growth has slowed Second we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains And finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end The debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open

Stakeholder Capitalism A Global Economy that Works for Progress People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us To help us see our challenges more clearly Schwab the Founder and Executive Chairman of the World Economic Forum looks for the real causes

of our system's shortcomings and for solutions in best practices from around the world in places as diverse as China Denmark Ethiopia Germany Indonesia New Zealand and Singapore And in doing so Schwab finds emerging examples of new ways of doing things that provide grounds for hope including Individual agency how countries and policies can make a difference against large external forces A clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes Planning for future generations short sighted presentism harms our shared future and that of those yet to be born Better measures of economic success move beyond a myopic focus on GDP to more complete human scaled measures of societal flourishing By accurately describing our real situation Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems Chapter by chapter Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all

Tickling Sharks John Elkington, 2024-04-09 Speaking Tomorrow's Truth to Power Sustainability is going mainstream but where did the story start For decades the traditional capitalist business model required growth at all costs Business as usual guaranteed unsustainability Now in contrast we see growing adoption of greener practices but where did these ideas come from and where are the linked movements headed Drawing on a half century of experience since the early seventies Godfather of Sustainability John Elkington explains how a series of societal pressure waves have helped to transform business markets and ultimately capitalism He explains how he came to tickle the human sharks of the corporate world encouraging them to embrace once unthinkable ways of addressing new social economic environmental and governance priorities John's candid memoir tracks his colorful journey through youthful misadventures and inspirations to his pioneering work making business sense of sustainability Written in a knowledgeable thoughtful and humorous voice this witness statement explains and criticizes progress to date before sketching a manifesto for those determined to make the global economy more responsible more resilient and crucially more regenerative Connected Capitalism David Weitzner, 2021-04-13 Applying the classic teachings of Judaism Connected Capitalism is an empowering call to fix what is currently broken in our social political and economic spaces
