Geometry of Time and Space. (A Second Edition of "A Theory of Time and Space."). Alfred Arthur Robb, 1936

Time and Space Barry Dainton, 2016-04-15 The first edition 2001 of this title quickly established itself on courses on the philosophy of time and space This fully revised and expanded new edition sees the addition of chapters on Zeno's paradoxes speculative contemporary developments in physics and dynamic time making the second edition once again unrivalled in its breadth of coverage Surveying both historical debates and the ideas of modern physics Barry Dainton evaluates the central arguments in a clear and unintimidating way and is careful to keep the conceptual issues throughout comprehensible to students with little scientific or mathematical training The book makes the philosophy of space and time accessible for anyone trying to come to grips with the complexities of this challenging subject With over 100 original line illustrations and a full glossary of terms the book has the requirements of students firmly in sight and will continue to serve as an essential textbook for philosophy of time and space courses

works across time, space and languages R. R. K. Hartmann, 2003 *Institutions, Behaviour and Economic Theory* Heinrich Bortis, 1997 This book is about the conceptual foundations of an intermediate way between liberalism and socialism From a standpoint of economic theory this middle way is conceived of as a synthesis of classical Ricardian and Keynesian political economy While the former deals with proportions between individuals or collectives and society in tackling the problems of distribution and value on the basis of the surplus principle the latter is concerned with the scale of economic activity as explained by the principle of effective demand Political economy pictures the economic aspects of the functioning of the institutional system within which the behaviour of individuals is embedded The economy considered is primarily neither a market nor a planned economy but rather a monetary production economy To establish an alternative to liberalism and socialism requires setting up a system of the social sciences In this work suggestions are made for linking political economy with other social sciences i.e. sociology law and politics in the traditional sense thus establishing the unity of the social sciences In a Keynesian vein the social sciences are conceived of as moral sciences a view which gives rise to a specific philosophy of history To complete the picture issues of method associated with the theory of knowledge in the social sciences

and the problem of linking theory with historical reality are also covered *Reanimating Places* Tom Mels, 2016-12-05 Time space relationships are central to human geography This book seeks to reanimate time space by considering the links between lived experience various temporalities and particular places in terms of compounded and contested rhythms Time space rhythms emphasize the practical symbolic everyday and embodied qualities in the experience and making of our geographical environment Bringing together a team of renowned geographers who have been exploring such ideas over the past decades this book provides a unique and varied set of geographical approximations to the reanimation of place nature and landscape revealing a complex disputed world of politics sensory experiences and representations of space time Including case studies from Europe and North America the book addresses some important issues ranging from the symbolic orchestrations of landscape to deeply personal memories of particular natural rhythms Kant's Metaphysic of Experience H J Paton, 2014-03-18 First published in 2002 This is Volume II of four of a series on Kant's and provides a commentary on the First Half of the *Kritik Der Reinen Vernunft* with Kant's *Metaphysic of Experience* Vol II The Hypocritical Imagination John Llewellyn, 2008-03-07 For philosophers such as Kant the imagination is the starting point for all thought For others such as Wittgenstein what is important is only how the word imagination is used In spite of the attention the imagination has received from major philosophers remarkably little has been written about the radically different interpretations they have made of it *The Hypocritical Imagination Between Kant and Levinas* is an outstanding contribution to this vacuum Focusing on Kant and Levinas John Llewellyn takes us on a dazzling tour of the philosophical imagination He shows us that despite the different treatments they accord to the imagination there is much to be gained from comparing these two key thinkers From Kant Llewellyn shows how the imagination is the common root of all understanding He contrasts this with the thought of Emmanuel Levinas for whom the imagination plays an ambivalent role both as necessary for and a threat to recognition of the other John Llewellyn also introduces the importance of the work of Heidegger Schelling Hegel Arendt and Derrida on the imagination and what this work can tell us about the relationship between the imagination and ethics aesthetics and literature *The Hypocritical Imagination Between Kant and Levinas* is a brilliant reading of a neglected but important philosophical theme and is essential reading for those in contemporary philosophy art theory and literature
