Treating Parent Infant Relationship Problems Strategies For Intervention:

Treating Parent-Infant Relationship Problems Arnold J. Sameroff, Susan C. McDonough, Katherine L.

Rosenblum, 2005-07-12 Within a developmental framework this book presents a range of effective approaches to treating early relationship difficulties and promoting more sensitive and responsive parenting. Clinicians are guided to understand the different types of problems that parents have with infants and to determine how a given family might best be served whether by addressing health concerns that are affecting infant behavior, modifying parental beliefs or expectations, or targeting key caregiving skills. Leading experts detail their respective therapeutic models in a practical, clinician-friendly format including intervention guidelines and illustrative case material. Special topics covered include working with families of infants with special needs and with those at risk for child maltreatment.

Infant and Early Childhood Mental Health Kristie Brandt, Bruce D. Perry, Stephen Seligman, Ed Tronick, 2014-10-03 *Infant and Early Childhood Mental Health: Core Concepts and Clinical Practice* is a groundbreaking book that provides an overview of the field from both theoretical and clinical viewpoints. The editors and chapter authors, some of the field's foremost researchers and teachers, describe from their diverse perspectives key concepts fundamental to infant, parent, and early childhood mental health work. The complexity of this emerging field demands an interdisciplinary approach, and the book provides a clear, comprehensive, and coherent text with an abundance of clinical applications to increase understanding and help the reader to integrate the concepts into clinical practice. Offering both cutting-edge coverage and a format that facilitates learning, the book boasts the following features and content: A focus on helping working professionals expand their specialization skills and knowledge and on offering core competency training for those entering the field, which reflects the Infant Parent Mental Health Postgraduate Certificate Program (IPMHPCP) and Fellowship in Napa, CA that was the genesis of the book. Chapters written by a diverse group of authors with vastly different training, expertise, and clinical experience, underscoring the book's interdisciplinary approach. In addition, terms such as clinician, therapist, provider, professional, and teacher are intentionally used interchangeably to describe and unify the field. Explication and analysis of a variety of therapeutic models, including Perry's Neurosequential Model of Therapeutics, Brazelton's neurodevelopmental and relational Touchpoints attachment theory, the Neurorelational Framework, Mindsight, and Downing's Video Intervention Therapy. An entire chapter devoted to diagnostic schemas for children ages 0-5, which highlights the Diagnostic Classification of Mental Health Disorders of Infancy and Early Childhood (Revised DC:0-3R). With the release of DSM-5, this chapter provides a prototypical crosswalk between DC:0-3R and ICD codes. A discussion of the difference between evidence-based treatments and evidence-based practices in the field, along with valuable information on randomized controlled trials, a research standard that while often not feasible or ethically permissible in infant mental health work, remains a standard applied to the field. Key points and references at the end of each chapter and generous use of figures, tables, and other resources to enhance learning. The volume editors and authors are passionate about

the pressing need for further research and the acquisition and application of new knowledge to support the health and well being of individuals families and communities Infant and Early Childhood Mental Health Core Concepts and Clinical Practice should find a receptive audience for this critically important message Clinical skills in infant mental health Sarah Mares,Louise Newman,Beulah Warren,2017-08-22 Clinical skills in infant mental health the first three years provides an evidence based and practical approach to assessment of young children and their families across diverse settings The impact of attachment issues prematurity trauma parental mental illness substance abuse and other adverse circumstances is clearly explained and the quality of parenting and the importance of early relationships are addressed Family-Based Treatment in Child and Adolescent Psychiatry, An Issue of Child and Adolescent Psychiatric Clinics of North America Michelle L.
