Hofmann, Martha C. Tompson, 2004-07-26 While recent developments in psychopharmacology have been widely disseminated equally important advances in psychological strategies for severe mental health problems have received less attention Filling a crucial gap in the literature this volume brings together leading clinical scientists to present evidence based approaches for treating schizophrenia mood disorders substance use problems and severe personality disorders Cutting edge modalities presented include behavioral and cognitive behavioral therapies dynamic therapies interpersonal therapies couple and family treatments motivational interviewing and more Throughout step by step clinical guidelines are accompanied by illustrative case examples and patient therapist dialogues Particular attention is given to strategies for integrating psychological and pharmacological interventions as well as to gender and cultural issues in treatment **Using Technology to Enhance Clinical Supervision** Tony Rousmaniere, Edina Renfro-Michel, 2016-01-08 This is the first comprehensive research and practice based guide for understanding and assessing supervision technology and for using it to improve the breadth and depth of services offered to supervisees and clients Written by supervisors for supervisors it examines the technology that is currently available and how and when to use it Part I provides a thorough review of the technological legal ethical cultural accessibility and security competencies that are the foundation for effectively integrating technology into clinical supervision Part II presents applications of the most prominent and innovative uses of technology across the major domains in counseling along with best practices for delivery Each chapter in this section contains a literature review concrete examples for use case examples and lessons learned Requests for digital versions from the ACA can be found on wiley.com To request print copies please visit the ACA website here Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org Short-term Therapy for Long-term Change Marion Fried Solomon, 2001 Is it possible to effect deep lasting meaningful psychological change in a short period of time **Handbook of Evidence-Based Psychodynamic**

Psychotherapy Raymond A. Levy, J. Stuart Ablon, 2008-09-20 The importance of conducting empirical research for the future of psychodynamics is presented in this excellent new volume In Handbook of Evidence Based Psychodynamic Psychotherapy Bridging the Gap Between Science and Practice the editors provide evidence that supports this type of research for two primary reasons The first reason concerns the current marginalization of psychodynamic work within the mental health field Sound empirical research has the potential to affirm the important role that psychodynamic theory and treatment have in modern psychiatry and psychology The second reason that research is crucial to the future of psychodynamic work concerns the role that systematic empirical investigations can have in developing and refining effective approaches to a variety of clinical problems Empirical research functions as a check on subjectivity and theoretical alliances in on going attempts to determine the approaches most helpful in working with patients clinically Handbook of Evidence Based Psychodynamic Psychotherapy Bridging the Gap Between Science and Practice brings together a panel of distinguished clinician researchers who have been publishing their findings for decades This important new book provides compelling evidence that psychodynamic psychotherapy is an effective treatment for many common psychological problems *Psykoterapi för substansbrukssyndrom - betydelsen av affekter* My Frankl, 2019-01-08 Substance use disorder SUD is a serious disorder with severe consequences for the individual the family and for society Comorbidity is common in the SUD population and the diversity of the disorder calls for a multiplicity of treatment options The overall aim of this thesis was to explore the role of affects in psychotherapy for SUD Further aims were to investigate affect focused therapeutic orientations demonstrate the importance of common factors and evaluate a measure of affect phobia In Study I a naturalistic design was employed to examine how the discrepancy between patients expectations and experience of psychotherapy related to alliance in 41 patients 24 in individual therapy and 17 in group An additional analysis concerned whether different dimensions of role expectations predicted retention in psychotherapy Study II was the first psychometric evaluation of the Affect phobia test a test developed to screen the ability to experience express and regulate emotions Data were collected from two samples A clinical sample of 82 patients with depression and or anxiety participating in a randomized controlled trial of Internet based affect focused treatment and a university student sample of 197 students Data analysed included internal consistency test retest reliability factor analysis and calculation of an empirical cut off Study III focused on the feasibility of individual 10 week Affect Phobia Therapy APT for patients diagnosed with mild to moderate alcohol use disorder AUD and problematic affective avoidance in a nonconcurrent multiple baseline design Study IV comprised an evaluation of the feasibility and preliminary effectiveness of APT adapted to a structured group format for patients n 22 with comorbid substance use disorder and ADHD with core features of affective avoidance emotion dysregulation in an open design In Study I an overall discrepancy between role expectations and experiences was significantly related to a lower level of therapeutic alliance in group therapy This relationship was not found in individual therapy Expectations prior to psychotherapy characterized by

defensiveness correlated negatively with therapy retention even when controlling for waiting time for therapy In Study II the internal consistency for the total score on the Affect phobia test was satisfactory but it was not for the affective domains Anger Assertion Sadness Grief and Attachment Closeness Test retest reliability was satisfactory The exploratory factor analysis resulted in a six factor solution and only moderately matched the test s original affective domains An empirical cut off between the clinical and the university student sample were calculated and yielded a cut off of 72 points In Study III patients reported no adverse events due to the treatment and finished the whole study period The patients had different trajectories of alcohol consumption and craving and the hypothesis that heavy episodic drinking would subside during the time in therapy did not hold true In Study IV patients reported significant pre to post changes in increased self compassion and decreased affect phobia but no change in psychological distress or emotion dysregulation Craving fluctuated throughout the study period and patients drinking pattern changed in the direction of more social drinking Main conclusions are the following The Affect Phobia Test is a useful screening instrument for detecting emotional difficulties related to psychological malfunction APT in both group and individual format are feasible treatments for the SUD population and has the potential to broaden the treatment options for some patients with SUD Investigating expectations and fears prior to therapy may be means to prevent attrition Substansberoende r en allvarlig st rning och samsjuklighet ofta f rekommende Den stora variationen av sv righeter kr ver olika behandlingsalternativ Syftet med avhandlingen var att unders ka affekters roll i psykoterapi f r populationen Ytterligare syften var att unders ka betydelsen av gemensamma faktorer i psykoterapi samt normera ett sj lvskattningsformul r f r affektfobi I studie I unders ktes skillnaden mellan patienters f rv ntningar erfarenheter av terapi och allians I studie II utv rderades de psykometriska egenskaperna hos affektfobitestet I studie III och IV unders ktes genomf rbarheten av affektfobiterapi individuellt och i grupp Resultaten av studierna visade att st rre skillnad mellan rollf rv ntningar inf r och erfarenheter av terapi var signifikant korrelerade med l gre allians i gruppterapi Affektfobitestets psykometriska egenskaper var tillfredsst llande avseende skalan som helhet Affektfobiterapi visade sig ka adaptiv affektiv f rm ga och sj lvmedk nsla men behandlingen gav inget s kert st d f r p verkan p substansbruket Slutsatserna r att fokus p affekter i terapi f r substansberoende har betydelse och att affektfobiterapi r en genomf rbar behandling f r populationen Genom att unders ka f rv ntningar och r dslor inf r terapi kan avhopp f rhindras
