You have the latest devices and know that data to improve your performance are at hand, but putting it all together can be a daunting, confusing task. Triathlete, coach, researcher, and author Jim Vance maintains that despite access to the relevant information, most triathletes start a race undertrained or overtrained. Then put the numbers to work for you, translating your data into a comprehensive program based on your performance needs and triathlon goals. With **Triathlon 2.0**, you will learn these skills: Establish and identify optimal aerobic fitness base; Determine the exact number of intervals for the most effective training and quickest recovery; Identify performance markers to track training results; Develop a tapering plan for peak performance; Monitor pace and progress in real time. If you're serious about maximizing performance, then turn to the only program built around your personal performance data. With **Triathlon 2.0**, the power and plan are in your hands.

Growth Mindset: A Practical Guide Nikki Willis, 2019-01-10 The advantages of primary pupils developing and adopting a growth mindset, a phrase first coined by Carol Dweck, have been widely discussed in education establishments, and many teachers are aware of its benefits. A practical implementation of growth mindset theories is to understand which learning behaviours are the most effective: resilience, self-motivation, and determination are key learning behaviours that, when developed well in a child, will support a lifetime of learning. Primary children who are independent learners and who want to improve their own learning will naturally make better progress. But independent learning has to be modelled, encouraged, and resources need to be put in place to promote it. Nikki Willis presents a tried and tested framework that is easily transferable on how to develop growth

mindset in the primary classroom while ensuring that independent learners are developed with healthy learning attitudes Growth Mindset A Practical Guide is an invaluable guide filled with effective suggestions on how to create a growth mindset culture over time which will enhance the work already being done in primary schools In doing so a growth mindset culture will mean that primary learners will be eager to learn and want to achieve for themselves
