Practice of otology today requires a contemporary knowledge base coupled with concurrent skill sets and tempered with familiarity of the technological advances. This manual has been designed to address these three domains, making it a ready reference to guide specialists on the standards of care in practice. The chapters explore the current concepts with a background of past practices touching upon the basics of anatomy and physiology before dealing with clinical conditions and their management, covering specific clinical scenarios to develop a patient-oriented approach in the readers using evidence-based guidelines. **Key Features:** Focuses on clinical scenarios, decision making and current concepts, providing patient-based scenarios which are relevant to all surgeons practicing otology. Serves as a companion guide to standards of care for Otologists, neurotologists, otorhinolaryngologists, young surgeons and senior residents. Discusses various controversies in this

field and provides a general consensus guideline which is likely to be acceptable to most practitioners

Pain Management: A Multidisciplinary Approach, 1e (Clinics Collections) Joel J. Heidelbaugh, 2015-10-15 Clinics Collections Pain Management draws from Elsevier's robust Clinics Review Articles database to provide multidisciplinary teams including general practitioners, orthopedists, obstetricians, neurologists, gastroenterologists, nurses, and other healthcare professionals with practical clinical advice and insights on this highly prevalent disease and its comorbidities. Clinics Collections Pain Management guides readers on how to apply current primary research findings on pain management to everyday practice to help overcome challenges and complications, keep up with new and improved treatment methods, and improve patient outcomes. Areas of focus include physiology and general management, musculoskeletal pain of the head, neck, upper body, and lower body, as well as neurologic disorders, psychologic disorders, and special considerations. Each article begins with keywords and key points for immediate access to the most critical information. Articles are presented in an easy-to-digest and concisely worded format. Elsevier Clinics Collections provide concise reviews of today's most prevalent conditions and significant medical developments. Other Clinics Collections titles available include Type II Diabetes Mellitus, Asthma, and Obesity.

Temporomandibular Disorders César Fernández-de-las-Peñas, 2018-05-07 An authoritative and comprehensive account of the assessment and conservative management of temporomandibular disorders. Recent emphasis has been on evidence-based practice at the expense of the clinical reality, which should also take account of clinician expertise and patient preference. A sound research base is not always available. This text addresses the clinical reality of having to make decisions using other sources of knowledge in the absence of a comprehensive scientific rationale. It advocates clinical and evidence-informed practice, an approach which acknowledges the value of clinician experience and expertise, as well as research findings. Compiled and edited by two highly regarded and experienced practitioners, researchers, and authors who have already published many books and journal articles in the field. With contributions from a mix of 28 internationally based clinicians and clinician researchers, allowing the text to highlight both current best evidence and clinicians' expertise and experience. Contributors include talented young clinicians, as well as established experts in orthopaedic physiotherapy and world-level expert researchers.
