Resources,2019-03-01 Decision makers such as government officials need to better understand human activity in order to make informed decisions With the ability to measure and explore geographic space through the use of geospatial intelligence data sources including imagery and mapping data they are better able to measure factors affecting the human population As a broad field of study geospatial research has applications in a variety of fields including military science environmental science civil engineering and space exploration Geospatial Intelligence Concepts Methodologies Tools and Applications explores multidisciplinary applications of geographic information systems to describe assess and visually depict physical features and to gather data information and knowledge regarding human activity Highlighting a range of topics such as geovisualization spatial analysis and landscape mapping this multi volume book is ideally designed for data scientists engineers government agencies researchers and graduate level students in GIS programs Quantitative Techniques in

Participatory Forest Management Eugenio Martinez-Falero,Susana Martin-Fernandez,Antonio D. Garcia-Abril,2016-04-19

Forest management has evolved from a mercantilist view to a multi functional one that integrates economic social and ecological aspects However the issue of sustainability is not yet resolved Quantitative Techniques in Participatory Forest Management brings together global research in three areas of application inventory of the forest variables that determine the main environmental indices description and design of new environmental indices and the application of sustainability indices for regional implementations All these quantitative techniques create the basis for the development of scientific methodologies of participatory sustainable forest management *Environmental Management in Construction* Heng Li,Zhen Chen,2007-01-24 Demands on the construction industry are changing and it is now virtually essential for environmental management to be considered at all stages of a project Many construction managers are finding a quantitative approach

useful and this book outlines four quantitative methods which can be applied at different construction stages and which fit within a comprehensive framework of dynamic Environmental Impact Assessment EIA These include a method to quantitatively evaluate and reduce pollution and hazards levels a method to evaluate the environmental consciousness of proposed construction plans a method to reduce on site construction wastes through an incentive reward programme a method to promote C and D waste exchange in the local construction industry With an experimental case study of the application of these methods this book delivers a comprehensive review of environmental management issues in construction With regulatory requirements potentially favouring the quantitative approach this timely guide ensures that contractors will be able to keep pace with environmental management standards City of Hercules Intermodal Transit Center ,2012

Remote Sensing Modeling and Applications to Wildland Fires John J. Qu, William Sommers, Ruixin Yang, Allen Riebau, Menas Kafatos, 2014-12-12 Scientists and managers alike need timely cost effective and technically appropriate fire related information to develop functional strategies for the diverse fire communities Remote Sensing Modeling and Applications to Wildland Fires addresses wildland fire management needs by presenting discussions that link ecology and the physical sciences from local to regional levels views on integrated decision support data for policy and decision makers new technologies and techniques and future challenges and how remote sensing might help to address them While creating awareness of wildland fire management and rehabilitation issues hands on experience in applying remote sensing and simulation modeling is also shared This book will be a useful reference work for researchers practitioners and graduate students in the fields of fire science remote sensing and modeling applications Professor John J Qu works at the Department of Geography and GeoInformation Science at George Mason University GMU USA He is the Founder and Director of the Environmental Science and Technology Center ESTC and EastFIRE Lab at GMU **The SAA Archaeological Record** ,2004 The magazine of the Society for American Archaeology *Remote Sensing for Sustainability* Qihao Weng, 2016-11-17 Driven by the societal needs and improvement in sensor technology and image processing techniques remote sensing has become an essential geospatial tool for understanding the Earth and managing Human Earth interactions Remote Sensing for Sustainability introduces the current state of the art remote sensing knowledge integral for monitoring the world's natural resources and environments managing exposure to natural disasters and man made risks and helping understand the sustainability and productivity of natural ecosystems Bridging the gap between remote sensing and sustainability science this book examines theories and methods as well as practical applications of sustainable development for cities using remote sensing focuses on remote sensing methods and techniques for sustainable natural resources with emphasis on forests answers questions on how and what the remote sensing methods and techniques can do for the sustainability of environmental systems and examines the issues of energy use and sustainable energy sources using remote sensing technology in countries such as Germany China the U S drawing on case studies to demonstrate the applicability of remote

sensing techniques This comprehensive guide which can serve to professors researchers and students alike takes in consideration the United Nations set of sustainable development goals and intends to contribute to the GEO s Strategic Plan by addressing and exemplifying a number of societal benefit areas of remote sensing data sets methods and techniques for sustainable development

Lynx Blue Line Extension Northeast Corridor Light Rail Project, Charlotte-Mecklenburg County ,2011 ARC User ,2007 **National Forest Inventories** Erkki Tomppo,Thomas Gschwantner,Mark Lawrence,Ronald E. McRoberts,2009-12-02 Forest inventories throughout the world have evolved gradually over time The content as well as the concepts and definitions employed are constantly adapted to the users needs Advanced inventory systems have been established in many countries within Europe as well as outside Europe as a result of development work spanning several decades in some cases more than 100 years With continuously increasing international agreements and commitments the need for information has also grown drastically and reporting requests have become more frequent and the content of the reports wider Some of the agreements made at the international level have direct impacts on national economies and international decisions e g the Kyoto Protocol Thus it is of utmost importance that the forest information supplied is collected and analysed using sound scientific principles and that the information from different countries is comparable European National Forest Inventory NFI teams gathered in Vienna in 2003 to discuss the new challenges and the measures needed to get data users to take full advantage of existing NFIs As a result the European National Forest Inventory Network ENFIN a network of NFIs was established The ENFIN members decided to apply for funding for meetings and collaborative activities COST European Cooperation in Science and Technology provided the necessary financial means for the realization of the program
