Tools Extending Our Reach:

Bearing Witness Courtney S. Campbell, 2019-09-09 In *Bearing Witness* Courtney S. Campbell draws on his experience as a teacher scholar and a bioethics consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care. The book offers a distinctive exposition of a covenantal ethic of gift response responsibility transformation that informs a quest for meaning in the profound choices that patients, families, and professionals face in creating, sustaining, and ending life. Campbell's account of bearing witness offers new understandings of formative ethical concepts, situates medicine as a calling and vocation rooted in concepts of healing, affirms professional commitments of presence for suffering and dying persons, and presents a prophetic critique of medical assisted death. This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician-patient relationship. This innovative interpretation bears witness to the relevance of religious perspectives on an array of bioethical issues, from new reproductive technologies to genetics to debates over end-of-life ethics, and bears witness against the oddities of a market-oriented and consumerist vision of health care that is especially salient for an era of health care reform.

The Summit Friedmut Wilhelm, 2013-02-14 *The Summit* is not another book of advocacy for the environment, though it is a response to such a book by biologist Edward Wilson. It asks the question: what are the root causes of the human dilemma which now clouds our future and might render the earth unlivable at the turn of the century? *The Summit* is a hike through history and pre-history and takes the reader to the moment when thinking was born. It challenges the concept of a profit-driven society by calling for a new educational concept which will cultivate our innate abilities like love, compassion, and empathy. The new concept will make us forever aware of our interdependence with the biosphere. The dividends in terms of happiness will be much higher than an economic investment can achieve. It will usher in a new age of culture, arts, and religion. The call for a New Charter of Love and Compassion must become the rallying point of all who want to ensure that we have a future on this planet. Once the Millennium Generation makes it its battle cry, we will see real change happening. Asking for the purpose of your life: Here it is, help us shape and bring about the New Charter. Life will be fun again.

Tools Cara McCarty, 2014 *Tools* the catalogue for Cooper Hewitt's reopening exhibition showcases objects from ten of the Smithsonian Institution's museums to explore how diverse cultures, time periods, and multifarious activities provide a means of realizing designs, critical role in understanding our world, and to examine how tools offer insights into scientific, technological, and cultural changes in societies. It shows the interconnectedness of scientist, designer, historian, anthropologist, engineer, and artist through design thinking and problem-solving, while also revealing distinct perspectives and methodologies.

Dread Trident Curtis D. Carbonell, 2019-11-27 *Dread Trident* focuses on tabletop role-playing games as vital mechanisms in the increasing creation of realized worlds in modern culture. We often think of these as emerging from novel reading, film viewing, or video game playing; rarely do we consider the worlds of analog games.
