Troubled Lands The Legacy Of Soviet Environmental Destruction A Rand Research Study:

Troubled Lands D. J. Peterson, 2019-03-15 The dramatic revelations of environmental catastrophe in the Soviet Union made during the late 1980s and early 1990s were a driving force behind reform in and later the demise of the communist party state But while the Union no longer exists the independent republics confront the same dilemmas that plagued the Soviet state Will the goal of econ

The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin M.G. Bos, 2012-12-06 The irrigated area in the Aral Sea basin totals about 7.5 million hectare Part of the water supplied to this area is consumed by the irrigated crop the remainder of the supplied water drains to the groundwater basin to downstream depressions or back to the rivers During its use however this drained part of the water accumulates salts and chemicals The disposal of this polluted water causes a variety of environmental problems If the percentage consumed water of the total water supply to an irrigated area the so called overall consumed ratio can be increased less water needs to be drained This alleviates part of the related environmental problems Further if the overall consumed ratio for the above 7.5 million hectare is improved less water needs to be diverted from the rivers Hence more water can flow towards the Aral Sea As mentioned above part of the non consumed irrigation water drains to the groundwater basin Commonly the natural discharge capacity of this basin is insufficient to handle this imported water As a result the groundwater table rises towards the land surface causing waterlogging In semi arid zones this waterlogging triggers a soil salinity problem resulting to a significant reduction in crop yields The artificial increase of the discharge capacity and lowering of the groundwater table solves the soil salinity problem

Dead Cities Mike Davis, 2024-10-01 For the late great Mike Davis the ravaging of the climate by capital and his prescient analysis of its consequences for those of us left to deal with the resulting crises was always a central part of his urban geography In these wide ranging incisive and hauntingly relevant essays Davis asks us to consider what we would find if we put a microscope to the ruins of Metropolis and provides a riveting account of the

disasters natural man made and those as in the case of climate calamity where the distinction is impossible to make that he finds on the other end He begins his examination by sifting through the rubble of the twin towers in the wake of 9 11 presciently identifying the seeds of war already germinating in the scorched soil of ground zero and closes by considering how little prepared our hollowed out urban infrastructure is to deal with shocks of any kind be they from car bombs or ice storms In between we are treated to tours of blasted wastelands where American generals built and destroyed replicas of Berlin glimpses of Las Vegas s penchant for annihilating its own best known landmarks and other riveting tales of the dialectic between nature and the city Dead Cities written over twenty years ago abounds with prophecies fulfilled contains echoes of our current moment where conspiracies abound and anxieties drown out official celebrations of prosperity and offers dreams of alternative paths not taken *Socialist States and the Environment* Salvatore Engel-Di Mauro,2021-07-20 More than thirty years after the collapse of the USSR the critique of state socialism is still used to deny alternatives to capitalism irrespective of global capitalist ecological and social devastation There is seemingly nothing worthwhile salvaging from decades of state socialist experiences As the climate crisis deepens Engel Di Mauro argues that we need to re evaluate the environmental practices and policies of state socialism especially as they had more environmentally beneficial than destructive effects Rather than dismissing state socialism s heritage out of hand we should reclaim it for contemporary eco socialist ends By means of a comparative and multiple scaled approach Engel Di Mauro points to highly diverse and environmentally constructive state socialist experiences Taking the reader from the USSR to China and Cuba this is a fiery and contentious look at what worked what didn t and how we can move towards an eco socialist future *The American Bibliography of Slavic and East European Studies for 1994* Patt Leonard,Rebecca Routh,1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs *Slavic Review* ,1993 *RFE/RL Research Report* ,1993 *Bibliography of the Soviet Union, Its Predecessors and Successors* Bradley L.
