

HOW TO STEAM USING APPLIANCE

- Add water to Max Fill Line. Do not add water past this line. Do not allow water to evaporate. This will cause element to overheat and damage the unit.
- Water will boil at 212°F (100°C). When steaming or boiling turn dial to 50% (100°C) to ensure unit will not cycle and water will continue boiling.

DRAIN VALVE

- Valve must be in OFF position.
- Remove safety cap on drain valve.
- Screw valve spout attachment onto drain valve. Do not over-tighten. This could damage threads and cause leakage. If spout becomes snug in the up position turn counterclockwise until it is in the down position.
- Align spout over container with opening facing downward. Open valve to drain.
- Close valve when complete.
- Unused oil may be stored in appliance. Do NOT store water in appliance.

RESET FUNCTION

- Your appliance is equipped with an overheat safety feature.
- If appliance overheats it will shut off automatically.
- To reset appliance, unplug from outlet, then insert a toothpick into small hole found on inside of control panel. This will reset unit.

CAVITIES

- Cavities in unit are designed to catch grease and condensation from steam. Wipe out cavities using damp cloth after each use.

HOW TO CLEAN UNIT

WARNING

- Do not place control panel under running water. Immersing control panel and cord can cause electrocution.

Masterbuilt recommends cleaning unit prior to use.

Clean lid, inner pot, and basket with a damp cloth or sponge using a mild detergent. Rinse and dry thoroughly. These parts may also be cleaned in a dishwasher.

Clean outer shell, cord, control panel and element with a damp cloth or sponge using a mild detergent. Dry thoroughly. NEVER put these parts in a dishwasher or submerge in water.

STORAGE & MAINTENANCE

CAUTION

- Disconnect electric cord from outlet, before cleaning, servicing and/or removing heating element. Electrical shock can result in personal injury or death.
- Do not pour used oil in sink. Drain it back into oil containers.

Turn appliance off, unplug and let cool for 2 hours if using water, 5 hours if using oil before steaming or storing.
