long been accepted that the social and cultural meanings of the car far exceed the practical need for mobility This book
marks the first attempt to contribute to road safety considering in depth these meanings and the cultures of driving that are
shaped by them In the Company of Cars examines the perspectives that young people have on cars and explores the broader
social and cultural meanings of the car the potential it is supposed to fulfil and the anticipated benefits it offers to young
drivers From focus group research conducted in Australia the book takes up the views of young people on a range of topics
from media to car use to gender performance The author looks at the ways in which driving has been defined by articulations
of the car that emphasize valued features of the car driver such as gender youthfulness status age power raciness sexiness
ruggedness and competitiveness The book takes a global perspective on mobility considering the impact of cars and road
