international scholars address questions such as Is modern architecture used to construct specific narratives of childhood Is it taken to support negative narratives of alienation on the one hand and positive narratives of happiness on the other Do images of modern architecture support ideas of community Reinforce family values If so what kinds of architecture

community and family How is modern architecture placed vis vis the promotion of diversity ethnic religious gender etc How might the use of architecture in comic strips or the presence of specific kinds of building in fiction aimed at younger adults

be related to the groundwork laid in picturebooks for younger readers This book reveals what stories are told about modern architecture and shows how those stories affect future attitudes towards and expectations of the built environment

The Life Space of the Urban Child Gunter Mey,2017-09-08 The heart of this book is the translation of The Life Space of the Urban Child written in 1935 by Martha and Hans Heinrich Muchow Life Space provides a fresh look at children as actors and how they absorb their city environments It uses an empirical base connected with theories about the

worlds in which children live The first section provides historical background on Muchow s study and the author The second section presents the translation of the Life Space study as well as comments from an environmental psychologist s

perspective The third section reviews the study s theoretical foundations including the concept of critical personalism the perspectives of phenomenology and the notion of Umwelt environment The last section addresses various lines of research

developed from the Life Space study including Muchow s work in describing children in urban environments methodological approaches and the significance of space in social science and educational contexts The manner in which Martha Muchow

conducted her studies is itself of note She obtained access to the children in their environments and combined observation with cartographies and essays produced by the children This approach was new at the time and continues to inspire

researchers today This volume is the latest work in Transaction's History and Theory of Psychology series
