Restorative Just Culture in Practice Sidney Dekker, Amanda Oates, Joseph Rafferty, 2022-06-15 A restorative just culture has become a core aspiration for many organizations in healthcare and elsewhere. Whereas just culture is the topic of some residual conceptual debate, e.g. retributive policies organized around rules violations and consequences are sold as just culture, the evidence base on and business case for restorative practice has been growing and is generating increasing global interest. In the wake of an incident, restorative practices ask who are impacted, what their needs are, and whose obligation it is to meet those needs. Restorative practices aim to involve participants from the entire community in the resolution and repair of harms. This book offers organization leaders and stakeholders a practical guide to the experiences of implementing and evaluating restorative practices and creating a sustainable just restorative culture. It contains the perspectives from leaders, theoreticians, regulators, employees, and patient representatives. To the best of our knowledge, there is no book on the market today that can function as a guide for the implementation and evaluation of a just and learning culture and restorative practices. This book is intended to fill this gap. This book will provide, among other topics, an overview of restorative just culture principles and practices, a balanced treatment of the various implementations and evaluations of just culture and restorative processes, a guide for leaders about what to stop, start, increase, and decrease in their own organizations, and an attentive to philosophical and historical traditions and assumptions that underlie just culture and restorative approaches. The interest in just culture, not just in healthcare but also in other fields of safety critical practice, has been steadily growing over the past decade. It is a trending area. In this, it has become clear that 20-year-old retributive models not only hinder the acceleration of performance and organizational improvement but have also in some cases become a blunt HR instrument, an expression of power over justice, and a way to stifle honest reporting and learning. What is new in this then is the restorative angle on just culture as it has been developed over the last few years and now is practised and applied to HR, suicide prevention, healthcare improvement, regulatory innovations, and other areas. *Manpower*, 1974
