Turbotaal Van Sociobabble Tot Yuppie Speak:

Postmodifying Clauses in the English Noun Phrase Pieter De Haan, 1989 This book reports on the results of a project whose aim was to give a detailed description of a number of syntactic properties of postmodifying clauses in the English NP and study the way in which some of these properties are related to each other in a variety of text types The study is based on an examination of the Nijmegen Corpus which consists of slightly over 130 000 words of running text The structure of the NP is described basically in terms of four constituents DeterminerPremodifierHeadPostmodifier No fewer than 2 430

occurrences of postmodifying clauses in NPs were analysed A numerical coding scheme was designed in which 26 different variable features were encoded describing the properties of the postmodifying clauses These were processed and statistically analysed The book discusses the methodology adopted and the results of the statistical analyses Among the properties described are the function of NPs with postmodifying clauses the structure of these NPs the realisation and reference of the heads of these NPs the specific types of postmodifying clause the actual link words used the clause patterns occurring in the postmodifying clauses and the verb phrases in the postmodifying clauses Towards New Ways of Terminology Description

Rita Temmerman, 2000-06-15 Based on an empirical study of categorisation and lexicalisation processes in a corpus of scientific publications on the life sciences Rita Temmerman questions the validity of traditional terminology theory Her findings are that the traditional approach impedes a pragmatic and realistic description of a large number of categories and terms Inspired by the cognitive sciences she develops an alternative The main principles of this new theory imply a combined semasiological and onomasiological perspective only few categories can be clearly delineated form and content of definitions vary according to category types and user's requirements synonymy and polysemy are functional in special language and a diachronic approach is unavoidable This last principle implies the varying importance of historical information in definitions the non arbitrariness of lexicalisation and the importance of cognitive models In a last chapter the author shows how the methods and principles of the alternative approach are applicable in terminography and how this is going to have an impact on software for terminological database construction This book will be valuable for specialists in terminology theory practising terminographers and for anybody interested in special language cognitive models and prototype theory

Speaking from the Margin Anna Duszak, Urszula Okulska, 2004 The papers in this volume analyze the language situation under globalization in several European countries How does the spread of Global English affect the integrity of the local systems Changes in lexical and discursive repertoires are evidenced and discussed It is shown how new social identities are linguistically constructed and redefined in the social consciousness of the various local communities The authors see globalization as a major change in progress that sets in relief the dual capacity of language communication and identification The collection reconciles empirical data analysis with profound attention to a host of theoretical issues such as a new ecology for language under globalization or a new interdiscursivity of globalizing communications It is argued that globalization as

recontextualization of meanings poses a serious challenge for a new science of language The spatial imagery of center margin is chosen to expound on the complex interaction between the global and the local The concept of a glocal view on language affords a new perspective for coping with massive linguistic change **Turbo-taal** Jan Kuitenbrouwer, 1987 Korte beschrijving van diverse vormen van modieuze taalgebruik **Canadian Journal of Netherlandic Studies**, 2000
