Child Soldiers as Agents of War and Peace Leonie Steinl, 2017-08-19 This book deals with child soldiers involvement in crimes under international law Child soldiers are often victims of grave human rights abuses and yet in some cases they also participate actively in inflicting violence upon others Nonetheless the international discourse on child soldiers often tends to ignore the latter dimension of children's involvement in armed conflict and instead focuses exclusively on their role as victims While it might seem as though the discourse is therefore beneficial for child soldiers as it protects them from blame and responsibility it is important to realize that the so called passive victim narrative entails various adverse consequences which can hinder the successful reintegration of child soldiers into their families communities and societies This book aims to address this dilemma First the available options for dealing with child soldiers participation in crimes under international law such as transitional justice and criminal justice and their shortcomings are analyzed in depth Subsequently a new approach is developed towards achieving accountability in a child adequate way which is called restorative transitional justice This book is in the first place aimed at researchers with an interest in child soldiers children and armed conflict as well as international criminal law transitional justice juvenile justice restorative justice children's rights and international human rights law Secondly professionals working on issues of transitional justice juvenile justice international criminal law children's rights and the reintegration of child soldiers will also find the subject matter of great relevance to their practice Dr Leonie Steinl LL.M. none about the younger generation of Kurds who came of age during autonomous Kurdish rule This is a generation that unlike their forebears has no direct memory of the decades long campaigns of repression Studying and examining the rise of this generation of Kurdish young millennials Generation 2000 who came of age in the aftermath of the United States invasion of Iraq offers a unique approach to understand the dynamics in a region that underwent a substantial socio political transformation after 2003 as well as the impact of these developments on the youth population Pursuing different themes and lines of inquiry the contributors of the book analyze the challenges and opportunities for young men and women to fulfil their needs and desires and contribute to the ongoing quest for nationhood and nation building In this book our aim is to bring together a variety of perspectives from local and foreign academics who have been working on pressing issues in Kurdistan and beyond The chapters focus on an array of themes particularly including political participation political situation and change religiosity and extremism Taken together the chapters provide us with an introduction to youth politics in Kurdistan This book is just the first attempt to open academic and nonacademic debate on this subject at a time when protests around youth related issues are becoming a more prevalent method of political engagement in the region Our hope is that more research follows and supplements what has not been addressed in this book especially through the introduction of first hand youth perspectives to the core of this analysis and giving them a voice in nonviolent platforms

Childhood and the Production of Security J Marshall Beier, 2018-02-02 Responding to security scholars puzzling dearth of attention to children and childhoods the contributors to this volume reveal the ways in which they not only are already present in security discourses but are actually indispensable to them and to the political projects they make possible From zones of conflict to everyday life contexts in the post industrial Global North dominant ideas about childhood work to regulate the constitution of political subjects whilst variously enabling and foreclosing a wide range of political possibilities Whether on the battlefields of Syria in the halls of the UN or the conceptual musings of disciplinary Security Studies claims about or ostensibly on behalf of children are ubiquitous Recognizing children as engaged political subjects however challenges us to bring a sustained critical gaze to the discursive and semiotic deployments of children and childhood in projects not of their making as well as to the ways in which power circulates through and around them This book was originally published as a special issue of Critical Studies on Security
