Yunani Dwa Khana Urdu:

Barque's Pakistan Trade Directory and Who's who, 1960 Endophytes Ravindra H. Patil, Vijay L.

Maheshwari, 2021-03-25 This book describes the various therapeutic and commercial applications of compounds produced by endophytes. Endophytes are microorganisms that reside in the living internal tissues of plants without showing any apparent symptom of their presence. During their life cycle they establish a symbiotic or parasitic relationship with the host plant. The book discusses different kinds of compounds that these endophytes produce and their potential properties such as antimicrobial, anti-oxidative, anti-inflammatory, anticancer, nutraceutical, immunomodulatory, etc. Other prospects of endophytic biology such as fungi of wild and domesticated crop plants and their applications in sustainable agriculture have also been included. The book also provides details about various techniques used in endophyte research: metabolite detection and bioactivity-based assays to explore endophytes; endophytes with phytohormones producing potential and their role in plant-microbial interactions under stress; are also discussed. The book also highlights novel strategies to tap into the hidden potential of endophytic fungi for the production of novel biomolecules using an integrated approach. These microorganisms have attracted a lot of scientific attention worldwide because of their huge potential for novel phytochemicals, pharmaceuticals, and lead compounds. Hundreds of new novel endophytic fungi have been isolated, identified, and systematically studied in the last decade. However, this is the first of its kind systematic compilation of potential biotechnological applications of endophytic compounds. Chapter contributions from groups across the globe make this book very up-to-date and informative. This book is very useful and interesting for students and researchers in the field of microbiology, plant sciences, mycology, and pharmacology. It is also helpful for industry experts working on developing novel compounds.

Herbal Bioactives and Food Fortification D. Suresh Kumar, 2015-09-25 Recent major shifts in global health care management policy have been instrumental in renewing interest in herbal medicine. However, literature on the development of products from herbs is often scattered and narrow in scope. *Herbal Bioactives and Food Fortification: Extraction and Formulation* provides information on all aspects of the extraction of **Decolonizing Science and Modernity in South**

Asia Sahara Ahmed, Suvabrata Sarkar, 2024-09-19 This book offers a unique perspective on the colonial roots of modern science, technology, and medicine in South Asia. The book questions the deconstruction of imperial visions and definitions of science and modernity in South Asia. It presents an in-depth analysis of the contested relationship between science, modernity, and colonialism. It explores how new research can contribute to the diversification of perspectives in the history and sociology of modern South Asian studies. The chapters in the book delve into various aspects of STM in South Asia. It covers diverse topics including the social, cultural, and pedagogic context of early modern Bengal, the popularization of science in colonial Punjab, the Hindi science periodical *Vigyan*, and the emergence of the Indian science community. The book also examines the intersection of indigenous medical practices (ayurveda, Unani) and medical revivalism and highlights

peripheral creativity in science The contributors engage with the existing historiography to raise new questions concerning the global circulations of scientific knowledge from the perspective of South Asia and the regional appropriation of the same It connects the history of science and modernity with South Asia s socio economic and cultural background It offers valuable insights into the decolonization of STM It greatly interests scholars and students of modern South Asian history sociology social anthropology and Science Technology and Society Studies STS

Psychological Perspectives on Childcare in Indian Indigenous Health Systems Malavika Kapur,2015-06-22 This

book examines childcare in ancient Indian health systems from the perspective of developmental psychology The author extensively studies ancient texts and charts from Ayurveda Unani Siddha and Tibetan medicines and analyses how gleanings from these systems can be useful in creating preferred practices for modern childcare systems Though the four systems originated in different geographical regions they share many common core constructs of a holistic approach consisting of mind body unity The core of psychological healing in these systems rests on bringing about harmony and balance of disturbed functions through diet daily regimen and drugs However despite commonalities understanding of childcare in the four systems varies a great deal The differences seem to be rooted in local sociocultural religious and folk healing practices Remarkably in all of them prescriptions of drugs and behaviour are psychologically grounded and uncannily modern from the perspective of developmental psychology The book raises the following questions as important for further research whether holistic approaches be adopted for the empirical study of indigenous health systems where their strength lies whether personality frameworks identified in the four systems can be incorporated into contemporary medical practice to its advantage whether preferred childcare practices among the four systems can be studied empirically in current paediatric psychological and parenting research and whether faith if it is of importance to the patient can be incorporated as an element into contemporary medical practice
