The unique focus of this text integrates constructivist learning diversity and instruction based assessment and helps translate
principles into practice The central underlying thesis of Teaching Language and Literacy is that children are at the center of
all good language and literacy teaching The text with broad coverage of preschool through the elementary grades advocates
an appreciation of student diversity and an implementation of assessment strategies relating to specific learning teaching
events The text describes how children construct their own knowledge about oral and written language by engaging in
integrated meaningful and functional activities with other people in a variety of contexts It then goes one step further
describing how teachers can design authentic classroom reasons for using oral and written language In keeping with the text
s theme illustrations of how teachers can work effectively with diverse learners appear throughout the text In addition
instructionally linked assessment is another important topic central to the text **Journal of the Minnesota Education
