the related problems such as antibiotic resistance Nevertheless the OH scenarios include and should increasingly include environment and health problems Food and environment do interact Environment influences the living organisms that produce human food and in the meanwhile food production outputs influence the environmental quality as for foods of animal origin feed materials and practices are driving components of the environment food interactions In this book we aimed at highlighting the importance of environment chemical exposures and toxicological issues in the field of OH as well as the need for multidisciplinary integration in order to support OH approaches into diseases prevention and health promotion *The Genus Rhipicephalus (Acari, Ixodidae)* Jane B.
