[Abstracts](#), 1983 **Science-based conservation of tigers: Assessing the past to prepare for the future** Carlos Ruiz-Miranda, Fernanda Michalski, Vanessa Hull, Miha Krofel, Luke Hunter, Zuofu Xiang, 2024-06-13 In this Research Topic we plan to assess the interface of conservation and science looking at the various aspects of tiger conservation by assessing what advances have been made in each relevant field where are the limitations and what does the data show us about successes and failures in conserving tigers their prey and their habitat Through a series of multiple authored papers we plan to explore the realms of tiger and prey monitoring law enforcement habitat restoration efforts human tiger conflicts landscape connectivity and ultimately how tiger conservation strategies have evolved and emerged leading up to the present Coming at this critical time with 2022 being the Year of the Tiger and the end of a 12 year pledge by Tiger Range Countries to double tiger numbers this Research Topic will provide a landmark publication reflecting back on the past 12 and more years of tiger conservation and research and laying the foundation for the coming twelve years While the focus is on tigers the studies will have wide application to efforts to conserve other large bodied carnivores In 2010 the lunar year of the tiger a Tiger Summit was held in the Russian city of St Petersburg where 13 Tiger Range Countries pledged to double tiger numbers by the next lunar year of the tiger in 2022 The science of tiger conservation has developed in multiple ways over the past twelve years As we approach this benchmark when tiger range countries will be reporting on their past efforts and planning for the next twelve years it is important to assess what has been accomplished and what yet needs to be done where there have been successes and what has not worked This is why it is particularly important to employ a science based

approach to conservation something that is not universally adopted by tiger conservation advocates but which we as editors of this collection consider central to successful tiger conservation This Research Topic will lay the foundation for effective science based conservation of tigers for the next twelve years In 2021 a collection of representatives from the international tiger conservation community developed a joint NGO vision of priorities in tiger conservation for the coming twelve years In this Research Topic we plan to focus on the critical issues for global tiger conservation as identified by this international group This topic will discuss these issues and highlight how they have been addressed in diverse tiger landscapes including both successes and failures Our goal is to provide a foundation and structure for site based tiger conservation actions within and beyond the next 12 year lunar cycle This Research Topic was conceptualized and launched by Dale Miquelle Thomas Gray Luke Hunter Abishek Harihar John Goodrich and Matthew Linkie in collaboration with Frontiers to focus on The Convergence of Site based tiger conservation strategies Opportunities for restoration of tigers across their historical range Recovery of tigers in Thailand s tiger conservation landscapes what works An integrated law enforcement approach for protecting tigers and their prey in Sumatra Cost of ranger protection for tiger protected area Evaluating a site based enforcement strategy Malaysia Beyond density better indicators for tiger monitoring Prey Recovery is the foundation of tiger restoration Resolving human tiger conflicts Community based tiger conservation Can it work Ensuring connectivity of tiger conservation landscapes Emerging infectious disease threats Tiger conservation and global regional initiatives

ERDA Energy Research Abstracts ,1983 **Movement and Connectivity of Large Pelagic Sharks** Mark Meekan,J. Marcus Drymon,David Wells,Clive N. Trueman,Yannis Peter Papastamatiou,Johann Mourier,2023-09-08 **Contributions of Zoos and Aquariums to the Advancement of Marine Science** Steven T. Kessel,Charles Knapp, Tracy A. Romano,Alistair Dove , Heather Jane Koldewey,2025-02-13 As zoological organizations evolve in the twenty first century to address the biodiversity extinction crisis and proactively demonstrate relevance in a changing public opinion landscape their conservation science portfolios continue to expand Public zoos and aquariums address these issues directly by conducting both ex and in situ research designed to advance our understanding of species while also detecting diagnosing and halting population declines in the wild In particular the distinct nature of zoological organizations uniquely positions them to make significant contributions to marine science The ability to care for and access a diverse suite of marine species provides the opportunity to understand their behavior biology physiology which can inform ex situ investigations Moreover the broad skillsets of staff facilitate extensive collaborative research opportunities These ongoing contributions to marine science have remained relatively underappreciated by others outside the community Here we intend to raise awareness about these contributions and initiate further collaborative research opportunities Building on an increasing body of literature our goal is to curate a diverse portfolio of research that represents the contributions of zoos and aquariums to the field of marine science and to highlight the novel qualities of these conservation based organizations These can broadly be divided into four main

categories i Infrastructure extensive capacity to care for a wide variety of animals extensive veterinarian hospital spaces and equipment advanced water quality and microbiology labs research vessels and the generation of funds through ticket sales and contributions ii Animal care expertise in maintaining animals under professional human care including breeding diverse veterinary expertise development of species specific research techniques relevant to the study of wild populations iii Dedicated research programs personnel typically focused on wild populations ecosystems and iv Education and social science policy and advocacy education and outreach large audiences to educate engage on conservation issues and inspiring the next generation of conservation champions biologists This will serve to further bring zoos and aquariums to the forefront as potential collaborators for other marine scientists conducting both in situ and ex situ research particularly those studies that would benefit from the unique opportunities and rare and endangered species zoos and aquariums provide **The**
