The EU, the US and China _ Towards a New International Order? Jing Men, Wei Shen, 2014-02-28 The interaction between the EU the US and China is of particular importance to the formation of the international order in the 21st century This book focuses on the latest developments and examines how critical the interactions between these three pl **China and the European Union** José María Beneyto, Chun Ding, Xinning Song, 2013-07-10 Any analysis of the current state of international affairs would require devoting a great deal of its efforts to the examination of the People s Republic of China its policies its capabilities its approaches as well as its position regarding a wide range of issues Not in vain the People s Republic of China is a rising power whose attitudes and policies will have a direct impact on the future development of the international system and the international relations within Thus the importance of the People s Republic of China status as a permanent member of the United Nations Security Council the impressive growth of both its GDP and its Defence Budget over the last few years and its relatively good performance through the global financial and economic crisis are all factors that might recommend to pay attention to the evolution of this country Issues in EU and US Foreign Policy Münevver Cebeci, 2011-01-06 Issues in E U and U S Foreign Policy edited by M nevver Cebeci aims at analyzing the perceptions interests and policies of the EU and the US on various international issues It portrays their convergences and divergences and reflects on their interplay The book has a geographical focus rather than a thematic one however some themes such as weapons of mass destruction dual use technology transfer energy security and democratization are unavoidable within their respective geographical contexts For example the authors inquire into the case of Iran with a special focus on nuclear proliferation they investigate Russia with a significant emphasis on energy security Iraq is examined with a discussion on the withdrawal of occupation troops and finally the authors address the case of China with a debate on dual use technology transfer Issues in European Union and U S Foreign Policy is composed of two parts The first involves an inventive theoretical framework for understanding EU and US foreign policy The analysis extends beyond traditional approaches that seek to explain US and EU foreign policy through various dichotomies such as soft power versus hard power without overlooking the significance of such dichotomies This section further discusses how European and American scholars approach transatlantic relations in different ways The second section covers an intensive comparative analysis of EU and US foreign policy on specific issue areas Some chapters also deal with the impact of their policy divergences and convergences on transatlantic relations and NATO Nevertheless the book aims to go beyond the parochial debates of burden sharing or division of labor in transatlantic relations It focuses on and actually proposes a broader framework of cooperation and coordination for the EU and the US **Global Security Watch—China** Richard Weitz, 2013-07-10 This book presents a comprehensive overview of China s main foreign and defense policies providing students policy makers and general readers with an up to date assessment of this most important country Global Security Watch China presents a comprehensive overview of the main foreign and defense policies of the People s

Republic of China emphasizing the political military developments in the modern era since the 1989 Tiananmen Square incident It provides a historical overview in the first chapter followed by information on the domestic factors that affect Chinese national security such as economics society and politics China s external objectives its global energy strategy and its defense policies and security objectives Drawing upon a wide variety of domestic and foreign primary sources the work details China s policies and its relationships with the United States Europe the Middle East Latin America Asia and Eurasia It includes biographical sketches of select individuals of importance to modern Chinese history such as Mao Zedong and Deng Xiaoping Appropriate for audiences ranging from university students to policy makers to general readers this book is an excellent resource for academic libraries and suitable as a textbook for courses on contemporary Chinese politics and international relations

Reframing the Buffer State in Contemporary International Relations Bibek

Chand,2023-05-17 This book explores buffer states agency beyond being highly interactive spaces for the competing strategic and security interests of larger powers Analyzing 21 political events the author offers a new conceptual framework for the buffer state which emphasizes strategic utility and agency Applying this to the case study of Nepal as a buffer state between India and China he offers a systematic analysis of Sino Indian interests in the wider region and Nepal s interactions with and reactions to them and argues that the buffer state in contemporary international relations is characterized by intense competitive overtures from its contending neighboring states However the buffer state is not just a spectator but an active participant that consistently assesses and reassesses its geopolitical position in between much larger competing powers This reading offers a new understanding of the buffer state as a highly dynamic political space wherein the levels of influence and strategies of bigger powers can be examined Aimed at a multidisciplinary audience this book will be of particular interest to scholars practitioners and students of international relations security studies strategic studies and Asian Studies
