TREATMENT PLAN GOALS AND OBJECTIVES

ANGER CONTROL PROBLEMS

GOALS

- The client will develop effective anger recognition skills by accurately identifying triggers and physiological cues.
- The client will enhance emotional regulation abilities by employing relaxation techniques when anger arises.
- The client will cultivate adaptive coping strategies to manage anger, reducing verbal and physical expressions of frustration.
- The client will improve communication skills to express emotions constructively and assertively.
- The client will enhance problem-solving abilities to address underlying issues contributing to anger.
- The client will demonstrate improved impulse control by reducing impulsive reactions in triggering situations.
- The client will increase self-awareness regarding thought patterns that escalate anger, working towards cognitive restructuring.
- The client will engage in weekly anger management exercises to reinforce skills outside of therapy sessions.
- The client will establish a support network and utilize it during moments of anger for guidance and encouragement.
- The client will achieve a measurable reduction in the frequency and intensity of anger episodes over the course of therapy.

OBJECTIVES

- The client will identify three personal triggers for anger within the next two sessions.
- The client will practice diaphragmatic breathing for at least 5 minutes daily to manage anger-related physiological responses.

- The client will learn and apply the ABC model (Activating event, Beliefs, Consequences) to analyze anger-provoking situations.
- The client will develop a list of alternative responses to replace aggressive reactions during anger-provoking situations.
- The client will engage in weekly role-playing exercises during sessions to improve assertive communication skills.
- The client will identify one recurring problem contributing to anger and outline a potential solution by the end of the month.
- The client will practice a progressive muscle relaxation exercise twice a week to reduce overall stress and anger vulnerability.
- The client will challenge and reframe one irrational thought related to anger each week using cognitive restructuring techniques.
- The client will report at least one instance where they successfully utilized a coping skill outside of therapy.
- The client will reach out to a friend or family member for support during moments of anger, documenting these interactions.
- The client will use a self-monitoring tool to track the frequency, intensity, and duration of anger episodes.
- The client will engage in anger management group therapy sessions to learn from others' experiences and strategies.
- The client will create a personalized anger management plan that outlines steps to take when they feel anger escalating.
- The client will participate in a relaxation training workshop to deepen their relaxation technique repertoire.
- The client will gradually expose themselves to controlled anger-triggering situations to practice emotion regulation.
- The client will identify at least two positive attributes about themselves during each session.
