comparative religion intellectual history and even the humanities in general Part of the purpose of this work is thus to help introduce scholars in the humanities and social sciences to this methodology and provide an example of how it may be applied to a particular sub field

Communication System Design Using DSP Algorithms Steven A. Tretter, 2003-01-31

Designed for senior electrical engineering students this textbook explores the theoretical concepts of digital signal processing and communication systems by presenting laboratory experiments using real time DSP hardware The experiments are designed for the Texas Instruments TMS320C6701 Evaluation Module or TMS320C6711 DSK but can easily be adapted to other DSP boards Each chapter begins with a presentation of the required theory and concludes with instructions for performing experiments to implement the theory In the process of performing the experiments students gain experience in working with software tools and equipment commonly used in industry
