civilizations of ancient Mesopotamia to our present day globalized society readers will learn how humans interacted and still interact with the environment around them as well as the environment's role in not only shaping the society's world view but enabling the building of socially stratified and successful civilizations. Additionally, the book examines how civilizations interacted with others from developing cross boundary trade to initiating wars of expansion. Finally, readers will also understand the impact of the study and application of geography such as the creation and use of maps and the study of cultures and Earth's processes. Readers will come away with a new understanding of the relevance of geography to not only human history but contemporary events as well as their day to day lives. Interconnection Susan M. Walcott, Corey Johnson, 2013-11-12 Connectivity as well as conflict characterizes Eurasia. This edited volume explores dynamic geopolitical and geo-economic links reconfiguring spaces from the eastern edge of Europe through the western edge of Asia, seeking explanation beyond description. The ancient Silk Road tied together space much as pipelines, railroads, telecommunications infrastructure and similar cultural and constructed links ease the mobility of people and products in modern Eurasia. This book considers Eurasia along an interlinked corridor with chapters illustrating the connections as a discussion foundation focusing on the shared interactions of a set of nation states through time and across space, generating more positive considerations of the resurgently important region of Eurasia. China's interests fall into three chapters: the southeastern border with Vietnam, the southwestern Himalayan edge and the western Muslim regions. Russia's recovery relates events to a larger landmass context and focuses on the importance of historic mobility. A geo-history of the Caspian considers this petroleum rich area as a zone of cultural and economic interconnection. The final focus on Central Asia treats the traditional heart of Eurasia. The concluding chapter pulls together strands linking subregions for a new concept of Eurasia as an area linked by vital interests and overlapping histories. *Eclectic Magazine, and Monthly Edition of the*

Living Age, 1849 **From Tribe To Empire** A. Moret, G. Davy, 2013-10-28 This seminal work, written in a close collaboration between an eminent sociologist and an eminent historian, shows that sociology is and should be the ally of the historian and vice versa. Taking Egypt and the Ancient East as the subject, this analysis of early society seeks to show the beginnings of social order and its first steps onto the ladder that leads to classical civilization of the ancient and modern world. The book covers in a systematic way both theoretically and historically: totemic organisation, individualized and communistic power, the progress from clans and kingdom, was especially in ancient Egypt and the Semitic world, the empires of Iran and the Barbarian invasions. A stimulating and authoritative study in history and sociology. **The history of civilization, from the**
