

TRIGGER POINT PAIN PATTERNS – Travell and Simons

Trigger point pain patterns are a common cause of musculoskeletal pain. They are characterized by a localized area of muscle tenderness (the trigger point) that can refer pain to other parts of the body. The pain is often described as a sharp, shooting, or burning pain. Trigger point pain patterns can be caused by a variety of factors, including overuse, injury, and stress. They can affect any muscle in the body, but are most commonly found in the neck, shoulder, and forearm. Trigger point pain patterns can be treated with a variety of methods, including massage, physical therapy, and medication. It is important to consult with a healthcare professional if you are experiencing trigger point pain, as they can help to identify the cause and recommend the best treatment plan for you.
