Wetlands Market And Intervention Failures:

Wetlands: Market and Intervention Failures Kerry Turner, Tom Jones, 2013-11-05 Wetlands are vital and valuable resources both as rich and unique wildlife habitats and for the functions they fulfil providing flood and sediment control and coastal protection as carbon sinks and pollution buffers for their role in storing and recycling nutrients as well as for their recreational value Too often however their true value has been overlooked or underestimated and they have been mismanaged or destroyed as a result This volume commissioned by the OECD presents four case studies of the management policies of wetland environments in the UK USA France and Spain They show how both markets and direct intervention have resulted in failure severely reducing the amount of wetland and jeopardizing the remainder and they set out measures that will mitigate damage in the future Turner and Jones have produced an essential work in the growing area of environmental economics Originally published in 1991 **Wetlands** R. Kerry Turner, Tom Jones, 1991 **Wetlands, Water, and the Law**

Clare Shine, Cyrille de Klemm, 1999 This publication sets wetlands in their scientific economic and legal context before describing the main legal issues involved in implementing the Ramsar Convention Parts 3 6 take an increasingly broad focus dealing respectively with site specific and bioregional approaches to wetland management generally applicable techniques for managing damaging processes and activities and lastly regional and international frameworks for cooperation The book complements the recent work of scientists and economists by describing how laws and institutions can work for or against wetland conservation and wise use Each chapter makes the link between international legal obligations and national or local mechanisms for delivering implementation Drawing on national practice around the world the book illustrates how different legal approaches and techniques can be adapted to widely varying national conditions and capabilities Key components for legal and institutional frameworks suited to the challenge of wise use implementations are set out in the conclusion

Market and Government Failures in Environmental Management Organisation for Economic Co-operation and Development, 1992 **Oceans and Aquatic Ecosystems - Volume I** Eric Wolanski, 2009-10-20 Oceans and Aquatic Ecosystems theme is a component of Encyclopedia of Natural Resources Policy and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The theme guides the reader through various pathways followed by surface water on earth It describes the dominant processes that govern how organisms interact with water and with each other and how they in turn can modify water properties This knowledge is important for humanity Indeed only by understanding our actions impacts upon water and the animals and plants living in it can we learn to exploit water marine and fresh water habitats and the living organisms without destroying the resources on which our livelihood and very survival depend The Theme on Oceans and Aquatic Ecosystems discusses matters of great relevance to our world such as Freshwater Wetland Resources and Biology Problems Restoration and Conservation of Lakes and Rivers Coastal Regions The Oceans and Seas Oceanic Islands These two volumes are aimed at the following five major
