What Women Want--What Men Want John Marshall Townsend, 1998-04-23 Following the work of E O Wilson Desmond Morris and David Buss **What Women Want** **What Men Want** offers compelling new evidence about the real reasons behind men s and women s differing sexual psychologies and sheds new light on what men and women look for in a mate the predicament of marriage in the modern world the relation between sex and emotion and many other hotly debated questions Drawing upon 2000 questionnaires and 200 intimate interviews that show how our sexual psychologies affect everyday decisions John Townsend argues against the prevailing ideologically correct belief that differences in sexual behavior are culturally constructed Townsend shows there are deep seated desires inherited from our evolutionary past that guide our actions In a fascinating series of experiments men and women were asked to indicate preferences for potential mates based on their attractiveness and apparent economic status Women overwhelmingly preferred expensively dressed men to more attractive but apparently less successful men and men were clearly inclined to choose more attractive women regardless of their professional status Townsend s studies also indicate that men are predisposed to value casual sex whereas women cannot easily separate sexual relations from the need for emotional attachment and economic security Indeed wherever men possess sexual alternatives to marriage and women possess economic alternatives divorce rates will be high In the concluding chapter Townsend draws upon the advice of couples who have maintained their marriages over the years to suggest ways to survive our evolutionary predicament Lucidly and accessibly written **What Women Want** **What Men Want**
