What Is A City Rethinking The Urban After Hurricane Katrina Paperback:

What is a City? Philip E. Steinberg, Rob Shields, 2008-01-01 The devastation brought upon New Orleans by Hurricane Katrina and the subsequent levee system failure has forced urban theorists to revisit the fundamental question of urban geography and planning What is a city Is it a place of memory embedded in architecture a location in regional and global networks or an arena wherein communities form and reproduce themselves Planners architects policymakers and geographers from across the political spectrum have weighed in on how best to respond to the destruction wrought by Hurricane Katrina The thirteen contributors to *What Is a City* are a diverse group from the disciplines of anthropology architecture geography philosophy planning public policy studies and sociology as well as community organizing They believe that these conversations about the fate of New Orleans are animated by assumptions and beliefs about the function of cities in general They unpack post Katrina discourse examining what expert and public responses tell us about current attitudes not just toward New Orleans but toward cities As volume coeditor Phil Steinberg points out in his introduction Even before the floodwaters had subsided scholars and planners were beginning to reflect on Hurricane Katrina and its disastrous aftermath and they were beginning to ask bigger questions with implications for cities as a whole The experience of catastrophe forces us to reconsider not only the material but the abstract and virtual qualities of cities It requires us to revisit how we think about plan for and live in them

The Wiley-Blackwell Encyclopedia of Urban and Regional Studies Anthony M. Orum, 2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor in Chief Anthony Orum this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world It also provides authoritative entries on the main conceptual tools used by anthropologists sociologists geographers and political scientists in the study of cities and regions Among such concepts are those of place and space geographical regions the nature of power and politics in cities urban culture and many others The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the globe including timely entries on Latin America Africa India and China At the same time it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today such as those of Friedmann and Sassen on global cities It also includes discussions of recent economic writings on cities and regions such as those of Richard Florida Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective with entries providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and

urban anthropology *Urban Ecologies* Christopher Schliephake, 2014-12-11 The term urban ecology has become a buzzword in various disciplines including the social and natural sciences as well as urban planning and architecture The environmental humanities have been slow to adapt to current theoretical debates often excluding human built environments from their respective frameworks This book closes this gap both in theory and in practice bringing together urban ecology with ecocritical and cultural ecological approaches by conceptualizing the city as an integral part of the environment and as a space in which ecological problems manifest concretely Arguing that culture has to be seen as an active component and integral factor within urban ecologies it makes use of a metaphorical use of the term perceiving cities as spatial phenomena that do not only have manifold and complex material interrelations with their respective natural environments but that are intrinsically connected to the ideas imaginations and interpretations that make up the cultural symbolic and discursive side of our urban lives and that are stored and constantly renegotiated in their cultural and artistic representations The city is within this framework both seen as an ecosystemically organized space as well as a cultural artifact Thus the urban ecology outlined in this study takes its main impetus from an analysis of examples taken from contemporary culture that deal with urban life and the complex interrelations between urban communities and their natural and built environments **The Great Music City** Andrea Baker, 2019-03-01 In the 1960s as gentrification took hold of New York City Jane Jacobs predicted that the city would become the true player in the global system Indeed in the 21st century more meaningful comparisons can be made between cities than between nations and states Based on case studies of Melbourne Austin and Berlin this book is the first in depth study to combine academic and industry analysis of the music cities phenomenon Using four distinctly defined algorithms as benchmarks it interrogates Richard Florida's creative cities thesis and applies a much needed synergy of urban sociology and musicology to the concept mediated by a journalism lens Building on seminal work by Robert Park Lewis Mumford and Jane Jacobs it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity **The Routledge Handbook of Architecture, Urban Space and Politics, Volume I** Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex

nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

Walking in Cities Evrick Brown, Timothy Shortell, 2016 Walking connects the rhythms of urban life to the configuration of urban spaces As the contributors and editors show in Walking in Cities walking also reflects the systematic inequalities that order contemporary urban life Walking has different meanings because it can be a way of temporarily taking possession of urban space or it can make the relatively powerless more vulnerable to crime The essays in Walking in Cities explore how walking intersects with sociological dimensions such as gender race and ethnicity social class and power Various chapters explore the flâneuse or female urban drifter in Tehran's shopping malls Hispanic neighborhoods in New York San Diego and El Paso and the intra neighborhood and inter class dynamics of gentrification in Greenpoint Brooklyn The essays in Walking in Cities provide important lessons about urban life

ATLAS Renata Tysczuk, 2012 With this ATLAS we are attempting to offer some means of navigating present and near

future challenges and to find ways of describing and responding to humanity's state of ecological economic and cultural interdependence P 4 **Bibliographic Index**, 2010 *Contextualizing Disaster* Gregory V. Button, Mark Schuller, 2016-09-01

Contextualizing Disaster offers a comparative analysis of six recent highly visible disasters and several slow burning hidden crises that include typhoons tsunamis earthquakes chemical spills and the unfolding consequences of rising seas and climate change The book argues that while disasters are increasingly represented by the media as unique exceptional newsworthy events it is a mistake to think of disasters as isolated or discrete occurrences Rather building on insights developed by political ecologists this book makes a compelling argument for understanding disasters as transnational and global phenomena **The British National Bibliography** Arthur James Wells, 2009 **Book Review Index - 2009 Cumulation** Dana Ferguson, 2009-08 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year **Spheres of Governance** Harvey Lazar, Christian Leuprecht, 2007 Local governments are becoming increasingly important around the world and functions are being shifted across levels of government This timely comparative analysis breaks new ground in the study of multilevel governance intergovernmental relations and municipal government *Spheres of Governance* systematically compares the challenges faced by municipalities in Australia France Germany Mexico South Africa Spain Switzerland and the United States with emphasis on the relationship between the municipal and federal levels Each chapter analyzes a municipality in relation to its responsibilities functions and organization constitutional and fiscal position relations with the central government provincial and state governments mediation of these relationships and public policy development especially with regard to emergency planning and immigration and settlement The chapters also highlight the tensions and pressures for change in the systems **New Orleans and the Design Moment** Jacob Wagner, Michael Frisch, 2014-06-11 Following the disaster of Hurricane Katrina in New Orleans people began to discuss and visualize the ways in which the urban structure of the city could be reorganized Rather than defining the disaster recovery process as simply a matter of rebuilding the existing city these voices called for a more radical rethinking of the city's physical social and environmental systems This idea of disaster as an opportunity for urban restructuring is a hallmark of a design moment Design moments are different from the incremental process of urban growth and development Instead of gradual growth and change design moments present the opportunity for a significant restructuring of urban form that can shape the city for decades to come As such a design moment presents a critical juncture in the historical growth and development of a city In this book we explore the question what does urban design have to do

with a disaster like Hurricane Katrina Focused on New Orleans the authors explore different dimensions of the post disaster design moment including the politics of physical redevelopment the city s history and identity justice and the image of the city demolition and housing development and the environmental aspects of the recovery process This book was published as a special issue of the Journal of Urban Design *Rebuilding Urban Places After Disaster* Eugenie Ladner Birch,Susan Wachter,2006 This volume examines the rebuilding of cities and their environs after a disaster and focuses on four major issues making cities less vulnerable to disaster reestablishing economic viability responding to the permanent needs of the displaced and recreating a sense of place Disaster Response Fred C. Pampel,2008 Each volume of the Facts On File Library in a Book series is carefully designed to be a first stop research source on important current issues Written clearly and carefully so that even the most complex aspects of the topic are easily understandable the books give the reader the essential information to begin work plus the research tools needed to delve more deeply into the issues Each book includes a history of the subject biographical information on important figures in the field a complete annotated bibliography and a carefully designed index everything the researcher needs to get down to work **Rethinking Disaster Recovery** Jeannie Haubert,2015-02-05 Rethinking Disaster Recovery focuses attention on the social inequalities that existed on the Gulf Coast before Hurricane Katrina and how they have been magnified or altered since the storm With a focus on social axes of power such as gender sexuality race and class this book tells new and personalized stories of recovery that help to deepen our understanding of the disaster Specifically the volume examines ways in which gender and sexuality issues have been largely ignored in the emerging post Katrina literature The voices of young racial and ethnic minorities growing up in post Katrina New Orleans also rise to the surface as they discuss their outlook on future employment Environmental inequities and the slow pace of recovery for many parts of the city are revealed through narrative accounts from volunteers helping to rebuild Scholars who were themselves impacted tell personal stories of trauma displacement and recovery as they connect their biographies to a larger social context These insights into the day to day lives of survivors over the past ten years help illuminate the complex disaster recovery process and provide key lessons for all too likely future disasters How do experiences of recovery vary along several axes of difference Why are some able to recover quickly while others struggle What is it like to live in a city recovering from catastrophe and what are the prospects for the future Through on the ground observation and keen sociological analysis Rethinking Disaster Recovery answers some of these questions and suggests interesting new avenues for research
